

The problem of hospital acquired infections.
Rational antibiotic therapy in physician practice.
 Problem zakażeń szpitalnych.
 Racjonalna antybiotykoterapia w praktyce lekarza.

^

1. IMPRINT

Academic Year	2026/2027
Department	Faculty of Medicine
Field of study	Medicine
Main scientific discipline	Medical sciences
Study Profile	General academic
Level of studies	Uniform MSc
Form of studies	Full time studies
Type of module / course	Non-compulsory (optional)
Form of verification of learning outcomes	Completion
Educational Unit / Educational Units	Department of Medical Microbiology Chałubiński str 5, 02-004 Warsaw
Head of Educational Unit / Heads of Educational Units	Prof. Hanna Pituch
Course coordinator	Beata Sokół-Leszczynska, M. Sc., Ph. D. beata.sokol-leszczynska@wum.edu.pl
Person responsible for syllabus	Beata Sokół-Leszczynska, M. Sc., Ph. D.
Teachers	Piotr Leszczynski, MD., Ph.D., Beata Sokół-Leszczynska, M. Sc., Ph.D.

2. BASIC INFORMATION

Year and semester of studies	I-III year, winter semester	Number of ECTS credits	2.00
FORMS OF CLASSES			

Contacting hours with academic teacher	Number of hours	ECTS credits calculation
Lecture (L)		
Seminar (S)	30 (e-learning)	1,2
Classes (C)		
e-learning (e-L)		
Practical classes (PC)		
Work placement (WP)		
Unassisted student's work		
Preparation for classes and completions	20	0.8

3. COURSE OBJECTIVES	
O1	Providing knowledge about healthcare-associated infections, basic definitions, and classification of healthcare-associated infections.
O2	Providing knowledge about risk factors for healthcare-associated infections.
O3	Developing skills in planning actions to prevent the transmission of microorganisms in the hospital environment.
O4	Learning the principles of prevention and control of healthcare-associated infections.
O5	Learning the principles of rational antibiotic therapy and antibiotic policy in the hospital.
O6	Raising awareness of the importance of rational antibiotic therapy in infection prevention.
O7	Shaping an attitude of responsibility for the epidemiological safety of patients and healthcare staff.
O8	Discussing the principles of prevention and control of healthcare-associated infections.
O9	Developing skills in recognizing situations requiring patient isolation and the use of personal protective equipment.
O10	Shaping an attitude of responsibility for the epidemiological safety of patients and healthcare staff.
O11	Preparing for collaboration with the microbiology laboratory and the hospital infection control team.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING	
Code and number of the effect of learning in accordance with standards of learning	Effects in the field of: <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 29th of September 2023)</i>

Knowledge – Graduate* knows and understands:

G.K1	genetic mechanisms of drug resistance acquisition by microorganisms and cancer cells and their relationship to the need for individualisation of pharmacotherapy;
G.K2	micro-organisms including pathogenic and those constituting the human microbiome, and human-invasive forms or life stages of selected parasites;
G.K3	the epidemiology of viral, bacterial, fungal and prion infections and parasitic infections, including their geographical distribution;
G.K4	the pathogenesis and pathophysiology of infections and contagions and the impact of pathogens such as viruses, bacteria, fungi, prions and parasites on the human body and population, including their modes of action, the consequences of exposure to them and the principles of prevention;
G.K5	aetiology, pathogenesis, pathophysiology, routes of transmission, forms, and prevention of iatrogenic infections;
G.K6	methods used in microbiological and parasitological diagnosis (indications, principles of performance, interpretation of results);
G.K7	diagnostic principles for infectious, allergic, autoimmune, and neoplastic diseases and blood diseases, based on the antigen-antibody reaction;
G.K8	principles of disinfection, sterilisation, and aseptic management;
G.K9.	the problem of drug resistance, including multidrug resistance, and the principles of rational antibiotic therapy;
G.K10.	principles for dealing with suspicion and detection of an infectious disease.
G.K11	environmental and epidemiological conditions, causes, symptoms, principles of diagnosis and therapeutic and preventive management of the most common infectious diseases and their complications: 5) hospital - acquired infections;
G.K12	procedures for exposure to potentially infectious material;
G.K13	types of biological materials used in laboratory diagnosis and the principles of collecting material for tests;
G.K14	possibilities and limitations of laboratory tests;
G.K15	epidemiology of infectious diseases, including those related to health care, and non-infectious diseases, types, and methods of prevention at various stages of the natural history of the disease, and the role and principles of epidemiological surveillance;

Skills– Graduate* is able to:

G.S1	interpret microbiological lab reports;
G.S2	design rational chemotherapy regimens for infections - empirical and targeted.
G.S3	7) collecting and securing blood for laboratory tests, including microbiological ones.
G.S4	9)taking swabs for microbiological and cytological tests;
G.S5	use personal protective equipment appropriate to the clinical situation;
G.S6	apply rational antibiotic therapy depending on the patient's clinical condition.

G.S7	accept, explain, and analyse your own role and responsibilities in the team and recognize your role as a doctor in the team;
G.S8	perform surgical hands scrub, put on sterile gloves, dress for surgery or a procedure requiring sterility, prepare the surgical field in accordance with aseptic rules and participate in the surgical procedure;

* In appendix to the Regulation of Minister of Science and Higher education from 29th of September 2023 „graduate”, not student is mentioned.

5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)	
Number of effects of learning	Effects in the fields of:
Knowledge – Graduate knows and understands:	
K1	basic epidemiology of infections caused by bacteria, viruses, fungi, and parasites, and their paths of spread in the human body;
K2	specific species of bacteria, viruses, fungi, and parasites, which are the most common etiological factors of infections and contagions;
K3	basic disinfection, sterilization, and aseptic procedures;
K4	disease risk factors: external and internal, modifiable, and non-modifiable;
K5	principles of epidemiological investigation of an infectious disease outbreak and procedures in the event of an epidemiological threat;
Skills– Graduate is able to:	
S1	interpret microbiological lab reports
S2	design regimens for rational chemotherapy of infections – empirical and targeted;
S3	perform basic procedures (...) hygienic and surgical hand disinfection (...)
S4	apply rational antibiotic therapy depending on the patient's clinical condition;
S5	assess the epidemiological situation of infectious diseases (...)
Social Competencies – Graduate is ready for:	
SC1	obtain information from team members while respecting their diverse opinions and specialist competencies and incorporating this information into the patient's diagnostic and therapeutic plan;

6. CLASSES		
Form of class	Class contents	Effects of Learning
e-learning	Introduction to hospital - acquired infections.	C.W9., C.W10., C.W11., C.W12., C.W14., C.W15., C.W16., C.W17., C.W32., E.W32., D.U5., E.W33., E.W34., E.W39., E.W40., G.W3., C.U6., C.U10., E.U14., E.U15., E.U22., E.U31., F.U1.
	Classification, epidemiology, and registration of hospital - acquired infections.	
	Risk of infections in selected hospital wards.	
	Registration of hospital - acquired infections.	

	Isolation and decontamination procedures.	
	The role of the microbiology laboratory in infection control.	
	Antibiotic prophylaxis and antibiotic therapy in hospital - acquired infections.	
	Rational antibiotic therapy.	
	Antibiotic stewardship.	
	Disinfection, sterilization, aseptic technique, and patient isolation.	
	Post - exposure management.	
	Hospital infection control teams – principles of operation.	
	Hospital-acquired infections – case studies.	
	Legal liability for hospital - acquired infections.	

7. LITERATURE

Obligatory

1. <http://www.cdc.gov/hai> - types of infection, guidelines, prevention, laboratory testing.

2. http://ec.europa.eu/health/ph_threats/com/docs/1589_2008_en.pdf - COMMISSION DECISION of 28/IV/2008 amending Decision 2002/253/EC

laying down case definitions for reporting communicable diseases to the Community network under Decision No 2119/98/EC of the European Parliament and of the Council

3. http://who.int/gpsc/tools/Five_moments/en
five moments for hand hygiene

Supplementary

For students who speak Polish to the extent that they can understand a medical professional recommendation:

1. Recommendations for the diagnosis and treatment of infections

<http://www.antybiotyki.edu.pl/szpitalna-polit-rekomendacje-diagnost.php>

2. Act of December 5, 2008, on preventing and fighting infections and infectious diseases in humans (Dz. U. of 2008.234.1570) and its implementing legislations

8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
C.W9., C.W10., C.W11., C.W12., C.W14., C.W15., C.W16., C.W17., C.W32., E.W32., D.U5., E.W33.,	Students work individually on clinical cases (text descriptions, laboratory/imaging test results).	Quizzes, problem-solving exercises, asynchronous discussion
	Analysis of instructional videos (e.g., hygiene, isolation, etc.)	
	Analysis of problem-solving tasks and interpretation of clinical cases developed online.	

E.W34., E.W39., E.W40., G.W3., C.U6., C.U10., E.U14., E.U15., E.U22., E.U31., F.U1.	On knowledge, skills, and social competencies, a 15-question test (single-choice, true-false) is provided.	>=50% + 1 point
---	--	-----------------

9. ADDITIONAL INFORMATION

E-learning classes will be **available** in their entirety on the platform <https://e-learning.wum.edu.pl/> **from October 26th, 2026, to January 25th, 2027.**

The minimum number of participants to start the course is 20, and the maximum is 50.

The course provides an understanding of the significance of hospital infection control in modern medicine and the contribution of specialist microbiologists to this field. The knowledge contained in the course materials is systematically updated based on sources such as the ECDC (European Centre for Disease Prevention and Control), the CDC (Centers for Disease Control and Prevention), the National Institute of Public Health (NIPH-NIH), and key scientific societies operating in Poland.

The practical knowledge gained during the course allows students to understand the pathophysiology of one of the most serious complications of healthcare services – hospital-acquired infections – enabling them to effectively prevent them, and to actively combat them if they do occur. The issue of rational antimicrobial therapy and antibiotic policy is discussed, as well as their role in infection therapy and control. The course also covers the legal aspects of healthcare-associated infections, including physician liability. For students who have not yet had contact with medical microbiology or have not completed the microbiology curriculum, it will provide a solid foundation for understanding this field, while systematizing and expanding their knowledge before the exam.

The curriculum consists of lessons that include a set of slides with theoretical material and a set of questions embedded in case studies to illustrate each problem. Students can work at their own pace. The course concludes with a 15-question test (single-choice, multiple-choice, and true-false). This set of questions is personalized for each student. It will be available after passing all topics/lessons, but no later than the last day of the course. Two attempts will be allowed. Upon successful completion, students will receive a certificate.

The PDF of **the certificate should be sent** to Dr. Beata Sokół-Leszczyńska, email: beata.sokol-leszczynska@wum.edu.pl, **no later than January 25th, 2027.**

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

ATTENTION

The final 10 minutes of the last class of the block/semester/year should be allotted for students to fill out the Survey of Evaluation of Classes and Academic Teachers
