

Translational Medicine and Advanced Biomedical Methods

(Medycyna translacyjna i nowoczesne metody biobiomedyczne)

1. IMPRINT

Academic Year	2026/2027
Department	Faculty of Medicine
Field of study	Medicine
Main scientific discipline	Medical sciences
Study Profile	General academic
Level of studies	Uniform MSc
Form of studies	Full time studies
Type of module / course	Obligatory (elective course)
Form of verification of learning outcomes	Completion
Educational Unit / Educational Units	Department of Regenerative Medicine MUW – 2W10 CePT 1b Banacha St., 02-097 Warsaw Ph: 48 22 116 61 05, e-mail: medycyna.regeneracyjna@wum.edu.pl
Head of Educational Unit / Heads of Educational Units	Prof. dr hab. n. med. Magdalena Kucia
Course coordinator	Dr n. med. Agnieszka Łukomska agnieszka.lukomska@wum.edu.pl Phone: 22 116 61 09
Person responsible for syllabus	Dr n. med. Agnieszka Łukomska agnieszka.lukomska@wum.edu.pl Phone: 22 116 61 09
Teachers	prof. dr hab. n. med. Magdalena Kucia, prof. dr hab. n. med. Mariusz Ratajczak, dr n. med. Agnieszka Łukomska, dr Justyna Jarczak, dr n. med. Diana Wierzbicka, dr Michalina Kazeł, dr Adrian Konopko, mgr Patrycja Kieszek

2. BASIC INFORMATION

Year and semester of studies	III year, summer, and winter semester	Number of ECTS credits	2.00
FORMS OF CLASSES			

Contacting hours with academic teacher	Number of hours	ECTS credits calculation
Lecture (L)		
Seminar (S)	30 (on-site and e-learning)	1.20
Classes (C)		
e-learning (e-L)		
Practical classes (PC)		
Work placement (WP)		
Unassisted student's work		
Preparation for classes and completions	20	0.80

3. COURSE OBJECTIVES

O1	Introduction to the paradigm and tools of translational medicine. To familiarize students with the key concepts of the "bench-to-bedside" process and the advanced biomedical technologies (including -omics techniques, cytometry, and 3D cultures) utilized in modern diagnostics and therapy.
O2	Development of skills in critical scientific analysis. To train students in evaluating and interpreting data from scientific publications, which forms the foundation of Evidence-Based Medicine (EBM), and to provide a practical introduction to selected research methodologies through workshops.
O3	Identification and fostering of scientific talent. To inspire students towards scientific development and create a selection platform for individuals with high research potential, aiming for their future integration into projects carried out by research teams at the Medical University of Warsaw (MUW) and CePT.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING

Code and number of the effect of learning in accordance with standards of learning	Effects in the field of: <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 29th of September 2023)</i>
--	---

Knowledge – Graduate* knows and understands:

B.W12.	functions of the human genome, transcriptome and proteome and the methods used to study them, the processes of DNA replication, repair and recombination, transcription and translation and degradation of DNA, RNA and proteins, and the concepts of regulation of gene expression;
B.W18.	functions and applications of stem cells in medicine;
B.W26.	principles of research for the advancement of medicine.
C.W8.	genetic diagnostic methods and the basic indications for their use;

C.W33.	options and types of biological, cellular, gene and targeted therapies for specific diseases;
D.W19.	the fundamentals of evidence-based medicine;
G.W8.	legal regulations regarding medical experiments and conducting scientific research involving humans;

Skills– Graduate* is able to:

B.U8.	use medical databases and correctly interpret the information they contain to solve problems in basic and clinical sciences;
B.U10.	classify scientific research methodology, including distinguishing between experimental and observational studies with their sub-types, ranking them according to the reliability of the results provided and correctly assessing the strength of scientific evidence;
B.U11.	plan and carry out scientific research and interpret the results and formulate conclusions;
D.U5.	critically analyse medical literature, including literature in English, and draw conclusions;
G.U11.	determine the feasibility of using new treatments for a given patient based on current clinical trial results;

* In appendix to the Regulation of Minister of Science and Higher education from 29th of September 2023 „graduate”, not student is mentioned.

5. ADDITIONAL EFFECTS OF LEARNING *(non-compulsory)*

Number of effect of learning	Effects in the fields of:
------------------------------	---------------------------

Knowledge – Graduate knows and understands:

K1	The basic stages and challenges associated with the process of research commercialization and technology transfer in biomedicine.
K2	The translational pathway from basic science discoveries to clinical validation and implementation in diagnostic medicine.

Skills– Graduate is able to:

S1	Integrate knowledge from various fields of basic sciences to analyze and propose a solution to a translational problem (case study).
S2	Present the assumptions of a simple translational scientific project in a concise and structured manner.

Social Competencies – Graduate is ready for:

SC1	Critically assess and utilize objective sources of scientific and clinical information.
SC2	Implement the principles of professional collegiality and effective cooperation within an interdisciplinary team.

6. CLASSES

Form of class	Class contents	Effects of Learning
Seminar 1 (2h)	From Bench to Bedside: What is Translational Medicine?	B.W26., K2
Seminar 2 (2h)	The Drug Development Pipeline: From Concept to Clinic.	B.W26., D.W19., G.U11.
Seminar 3 (2h)	Next-Generation Genomics and Transcriptomics.	B.W12., C.W8.

Seminar 4 (2h)	Proteomics: In Search of Molecular Machines and Biomarkers.	B.W12.
Seminar 5 (2h)	Metabolomics: The Metabolic Fingerprint of Diseases.	B.W12.
Seminar 6 (2h)	Cell Cultures as Disease Models (2D, 3D, and Organoids).	B.W18., C.W33.
Seminar 7 (2h)	Flow Cytometry: Theory and its Revolution in Diagnostics.	B.U12., C.W8.
Seminar 8 (2h)	Workshop: Demonstration in the Regenerative Medicine Laboratories.	B.U12., SC2
Seminar 9 (2h)	The Role of Animal Models and CRISPR/Cas9 Technology in Medicine.	B.W26., C.W33.
Seminar 10 (2h)	Workshop: How to Critically Appraise Scientific Publications Based on EBM Principles.	D.W19., B.U8., B.U10., D.U5., SC1
Seminar 11 (2h)	Technology Transfer and Research Commercialization: From Discovery to Startup.	K1
Seminar 12 (2h)	The Role of Artificial Intelligence (AI) and Big Data in Translational Medicine.	B.U8., K2, SC1
Seminar 13 (2h)	Case Study: A Biomarker's Journey from Discovery to Diagnostic Test.	S1, SC1, SC2
Seminar 14 (2h)	Student Presentations: Translational Mini-Projects.	B.U11., S2, SC2
Seminar 15 (2h)	The Physician-Scientist: How to Begin Your Journey in Research.	B.W26., G.W8., B.U11.

7. LITERATURE

Obligatory

1. **Course materials** provided by the instructors.
2. Wehling, M. (2021). *Principles of Translational Science in Medicine: From Bench to Bedside* (2nd ed.). Academic Press.

Supplementary

Hanna, J., & Hubbi, M. E. (2023). Organoids: Opportunities and challenges for translational medicine. *Nature Reviews Molecular Cell Biology*, 24(5), 285–302.

Sams-Dodd, F. (2020). Strategies to overcome translational challenges: the future of biomarker-guided drug development. *Drug Discovery Today*, 25(10), 1817–1825.

Li, M., & Izpisua Belmonte, J. C. (2022). Stem cell aging: mechanisms, regulators and rejuvenation. *Nature Reviews Molecular Cell Biology*, 23(8), 553–571.

Trounson, A., & McDonald, C. (2019). Stem cell therapies in clinical trials: progress and challenges. *Cell Stem Cell*, 27(4), 507–518.

Medical Research Agency (ABM). (2022). Guidelines for non-commercial and translational research. Warsaw.

8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
B.W12., B.W18., B.W26., C.W8., C.W33., D.W19., G.W8., B.U8., B.U10., B.U12., D.U5., G.U11., K1, K2, S1, SC1, SC2	Active participation in classes (40% of the final grade): Assessment of the substantive contribution to seminar discussions and engagement in group work during workshops, particularly during the Case Study analysis.	Obtaining a minimum of 60% of the points available for activity throughout the semester.

B.U11., S2, SC2	Final presentation (60% of the final grade): Preparation and delivery of a group presentation on a selected topic within translational medicine (mini-project).	Obtaining a minimum of 60% of the points from the presentation, assessed on its substantive content, structure, and the manner of presenting conclusions.
-----------------	--	---

9. ADDITIONAL INFORMATION

Classes are conducted in a hybrid format, meaning that some seminars and workshops are held in-person while others are conducted remotely (online). Due to the interactive nature of the classes, the group size is limited to 30 students. Detailed dates and locations for the in-person classes will be provided in the schedule at the beginning of the semester.

The condition for passing the course is to obtain a total of at least 60% of the points from the sum of both verification methods (activity + presentation) and to maintain attendance. One absence is permitted and must be made up in a form agreed upon with the instructor. The student is entitled to three assessment attempts. In the event of failing to reach the 60% threshold, retake assessments will be conducted as a written test covering the entire course material.

This elective course is strongly linked to research activities and aims to identify students with scientific potential. The most active participants will have the opportunity to join research projects. The Student Scientific Club of Regenerative Medicine operates within the department. We invite all students interested in scientific work and development in this field to join.

Club Supervisor: Agnieszka Łukomska, MS, PhD, Contact: agnieszka.lukomska@wum.edu.pl

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

ATTENTION

The final 10 minutes of the last class of the block/semester/year should be allotted for students to fill out the Survey of Evaluation of Classes and Academic Teachers
