Preparation for classes and completions		5	0.8

3. COURSE OBJECTIVES

O1	– knowledge of causes, symptoms, principles of diagnosis and therapeutic management within the scope of the most frequent genetic disorders in the population;
----	--

	– basic information in genetics, such as modes of inheritance and classification of genetic disorders,
O2	- application of diagnostic tests – understanding cytogenetic and molecular tests results; – skills to communicate genetic information to patients and their families.
O3	- ability to verify indications for pre- and postnatal diagnostics; – ability to make a decision on the necessity of performing genetic tests and choosing appropriate tests; - ability to gather and analyze medical genetic history and draw pedigrees,

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning <i>(in accordance with appendix to Regulation of Minister of Science and Higher education from 26th July 2019)</i>	Effects in time
---	------------------------

Knowledge – Graduate* knows and understands:

C.W3	normal human karyotype and rules of sex determination
C.W7	chromosomal aberrations as causes of human disease
C.W9	basic rules of genetic and chromosomal mutation diagnosis
C.W42	basic directions of therapy development, in particular the possibility of cell therapy and gene therapy in specific diseases
E.W3 10	causes, symptoms, principles of diagnosis and therapeutic treatment of the most common genetic syndromes in children
E.W5	basic methods of diagnosing and treating the foetus
E.W37	causes, symptoms, the rules of diagnosis and treatment of the most frequent inherited diseases

Skills– Graduate* is able to:

C.U2	identify indications for prenatal testing
C.U3	make informed decisions about necessity to perform cytogenetic and molecular testing
D.U5	conduct an interview with an adult patient, a child and the family with empathy and listen actively; is able to discuss the patient's life situation
D.U6	inform a patient of the purpose, course and any risk of proposed diagnostic or treatment actions and obtain informed consent from the patient
D.U8	pass bad news to a patient and his/her family

E.U16	plan diagnostic, therapeutic and preventive treatment
-------	---

* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)	
Number of effect of learning	Effects of learning in time
Knowledge – Graduate knows and understands:	
Skills– Graduate is able to:	
Social Competencies – Graduate is ready for:	
K1-K8	establishing and maintaining a deep and respectful contact with the patient, as well as showing understanding for worldview and cultural differences be guided by the good of the patient observance of medical confidentiality and patient's rights taking actions towards the patient based on ethical principles, with the awareness of social conditions and limitations resulting from the disease perceiving and recognizing own limitations and self-assessment of deficits and educational needs promoting pro-health behavior use of objective sources of information formulating conclusions from own measurements or observations

6. CLASSES		
Form of class	Class contents	Effects of Learning
Lecture 1	‘Value of clinical evaluation in genetics. Therapeutic management of genetic disorders.’ The lecture contains examples of more common genetic disorders along with the methods of their clinical diagnosis, both in the pre- and postnatal aspect. The second part shortly describes therapeutic management of genetic conditions.	C.W9 E.W310) E.W5 E.W37 C.U2 C.U3 E.U16
Lecture 2	‘Diagnostics and discovery of new genetic diseases in the age of next generation sequencing (NGS)’ The lecture presents the diagnostic possibilities of the NGS technique on specific examples of new genetic disorders.	C.W9 C.U3
Seminars and Practice	Reproductive genetics with elements of prenatal diagnosis Personalized pediatrics Practical cardiogenetics Precision therapies Familial hypercholesterolaemia Monogenic diabetes	C.W3 C.W7 C.W9 C.W42 E.W3 10)

	Genetic disorders with dysmorphism Clinical cytogenetics Neurogenetics Gene therapies	E.W5 E.W37 C.U2 C.U3 D.U5 D.U6 D.U8 E.U16
Practice Classes	PC1 Cytogenetics and dysmorphology PC2. Tasks - clinical cases in pediatrics and prenatal diagnosis PC3. Quiz - questions and answers (the most common genetically conditioned diseases and methods of their diagnosis and therapy) PC4. Neurogenetics and Gene Therapies All live classes in the room (contact exercises)	C.W7 C.W9 C.W42 E.W310) E.W37 E.W5 C.U2 C.U3 E.U16 D.U5 D.U6 D.U8 K1-K8
Additional materials	List of 28 genetic syndromes	E.W310) E.W37

8. VERIFYING THE EFFECT OF LEARNING			
Code of the course effect of learning	Ways of verifying the effect of learning		Completion criterion
<i>e.g. G.K1, G.S1, K1</i>	<i>This field defines the methods used for grading students e.g. pop quiz, test, written report etc.</i>		<i>e.g. threshold number of points</i>
C.W3, C.W7, C.W9, C.W42, E.W3 10), E.W5, E.W37 and from 2nd yr syllabus: C.W1, C.W2, C.W4-6, C.W8 i B.W13, B.W14	Exam (test)	Answering correctly to more than 50% of questions	
	Participation in live tasks	Verification of student’s presence and activities	

C.U2, C.U3, D.U5, D.U6, D.U8, E.U16	Oral report on performed tasks	Correctly performed tasks
K1-K8	Observation of student's behavior and interactions	Command of social competencies

9. ADDITIONAL INFORMATION (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

Students are obliged to attend a lecture, as well as all seminars and classes. No absence is accepted during classes. An absence on classes and seminars will have to be covered with another group. Change of groups is possible only as an exchange with a person from another group. Being late for over 15 minutes counts as an absence.

Person responsible for students affairs: Krzysztof Szczaluba, MD, PhD krzysztof.szczaluba@wum.edu.pl

Evaluation criteria	
Form of passing the course: exam (test). The exam evaluates the abilities and knowledge gained during the Genetics course during the fourth and sixth semesters of the studies (2 nd and 3 rd years).	
Grade	Criteria
2,0	Not getting over 50% of points
3,0	Getting at least 51% of points
3,5	Getting at least 61% of points
4,0 (good)	Getting at least 71% of points
4,5 (above good)	Getting at least 81% of points
5,0 (very good)	Getting at least 91% of points

O1	Composition and role of human microbiome.
O2	Basic properties of pathogenic species of microorganisms.
O3	Laboratory diagnosis of infections in humans.

O4	Principles of antimicrobial treatment and prophylactic measures.
O5	Principles of rational chemotherapy.
O6	Basic laboratory techniques, operation of simple measuring instruments, assessment of the accuracy of performed measurements important for proper cooperation between doctor and microbiologist in diagnosis of infectious diseases.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>	Effects in time
--	------------------------

Knowledge – Graduate* knows and understands:

G.K1/ C.W11	genetic mechanisms for the acquisition of drug resistance by microorganisms and tumor cells;
G.K2/ C.W12	classify microorganisms, with consideration of pathogenic and present in the physiological flora;
G.K3/ C.W13	epidemiology of infections with viruses and bacteria, fungi and parasites including geographical coverage of their distribution;
G.K4/ C.W14, C.W15	abiotic and biotic (viruses, bacteria) effects of the environmental factors on the human body and the population of people and the way of their entering the human body; consequences of exposure of the human body to various chemical and biological factors and the principle of prevention;
G.K5/ C.W16	invasive forms or developmental stages of selected parasitic fungi, protozoa, helminths, and arthropods, taking into account the geographical range of their occurrence;
G.K6/ C.W18	symptoms of iatrogenic infections, roads of their spread and pathogens causing changes in individual organs;
G.K7/ C.W19	basics of microbiological and parasitological diagnostics;
G.K8/ C.W20	basics of disinfection, sterilization and aseptic procedures;
G.K9/ C.W33	external and internal pathogens, modifiable and non-modifiable;
G.K10/ C.W40	understands the problem of drug resistance, including multi-drug resistance.

Skills– Graduate* is able to:

G.S1/ C. U6	assesses environmental threats and uses basic methods allowing to detect the presence of harmful factors (biological and chemical) in the biosphere;
G.S2/ C. U9	formulates a microscopic preparation and recognizes pathogens under the microscope;

G.S3/ C. U10	interprets the result of microbiological tests;
G.S4/ C. U15	designs rational regiment of chemotherapy of infections, empirical and targeted;
G.S5/ B.U9	uses simple measuring instruments and assesses the accuracy of measurements
G.S6/ D.U17	critically analyzes medical literature, and draws conclusions.

9. ADDITIONAL INFORMATION (information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)

As a preparation for the classes, before each class student should read subject related chapter from one of the books listed in the section 7 – Obligatory literature.

Classes starts on time, any student who came late will not be allowed to enter the classroom.

Laboratory classes are composed of theoretical and practical parts, which both are obligatory to participated in. Seminars classes are compulsory to participated in.

Student are NOT allowed to miss any classes during the whole course of microbiology.

In case of an absence (medical note is requested) student will have to write an essay on the missed subject. In case of more than 2 absences, (e.g. due to prolong hospitalization, natural disaster, etc.), situation will be analysed, and the decision if a student can continue the course is to be made individually in the agreement with the Dean.

Due to safety reason it is not possible to change group or participate in a class with another group.

During the classes, it is necessary to have protective clothing (lab coat) and, in the case of a special epidemic situation related to Covid-19, to wear personal protective equipment (disposable gloves, protective masks).

The laboratory classes are organized as practical activities. Students will be working with infectious material, therefore the following rules have to be observed:

- *hands must be washed and/or disinfected after each class,*
- **jewelry must be removed from hands/wrists for the time of classes,**
- **long hair must be tied back**
- *outer coats must be left in the cloakroom downstairs,*
- *protective gowns must be used in the laboratory classes room (brought to the first laboratory class and stored at the Department of Medical Microbiology for the duration of the course),*
- *eating, drinking, smoking (incl. e-cigarettes) is strictly forbidden.*

Students have the possibility of scientific cooperation with the Department as part of the activities of Student Scientific Associations (SKN):

1. SKN Microbiology at the Chair and Department of Medical Microbiology of the Medical University of Warsaw, tutor: dr hab. Ksenia Szymanek - Majchrzak, (xenia.szymanek@wum.edu.pl)

2. SKN Mycology "Mucor", tutor: dr Robert Kuthan (skn.mykologii@gmail.com, rkuthan@wum.edu.pl)

3. COURSE OBJECTIVES	
O1	The main objective is to provide necessary information on the biology, physiology and morphology of medically important parasites invading the tissues, organs and systems of the human body.
O2	Transfer of knowledge about current problems of medical parasitology, environmental factors of parasite invasion and dispersion, opportunistic species, pathogenesis and course of parasitic diseases in the states of immunosuppression or immunological defects and epidemiology of parasitic invasions.

O3	Making the future doctor aware of the dangers of parasites occurring in Poland and in the world.
O4	Learning the rules for conducting a correct parasitological interview with the patient.
O5	Introduction of the methods of modern laboratory diagnostics.
O6	Acquiring the student's ability to correctly interpret diagnostic test results.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning
(in accordance with appendix to Regulation of Minister of Science and Higher education from 26th of July 2019)

Effects in time

Knowledge – Graduate* knows and understands:

C.W13	Epidemiology of parasitic infections, including the geographical range of their occurrence.
C.W16	Human invasive forms or developmental stages of selected parasitic fungi, protozoa, helminths and arthropods, considering the geographical range of their occurrence.
C.W17	Principle of the parasite system - host and basic disease symptoms caused by parasites.
C.W19	Basics of parasitological diagnostics.

Skills– Graduate* is able to:

C.U6	Evaluate environmental threats and use the basic methods to detect the presence of harmful factors (biological and chemical) in the biosphere (in the field of parasitology).
C.U7	Recognize the most common human parasites on the basis of their structure, life cycles and disease symptoms.
C.U9	Prepare the preparation and recognize pathogens under the microscope (in the field of parasitology).

* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

Number of effect of learning

Effects of learning i time

Knowledge – Graduate knows and understands:

K1	Health education issues.
K2	Rules of conducting the scientific research and disseminating their results.

Skills– Graduate is able to:

S1	Carry out diagnostics of parasitic diseases, assess and describe the somatic and mental state of the patient.
S2	Critically evaluate the results of scientific research and properly justify the position.

Social Competencies – Graduate is ready for:

SC1	Transfer of knowledge in the society about parasitological threats in the country and during foreign travel, especially to tropical and endemic regions.
SC2	Use of objective sources of information.

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
C.W13, C.W16, C.W17, C.W19, C.U6, C.U7, C.U9	Question answer or quiz during classes.	The correct answer to the question.
C.W13, C.W16, C.W17, C.W19, C.U6, C.U7, C.U9	Colloquium at the end of the semester.	Obtaining over 55% points.
C.W13, C.W16, C.W17, C.W19, C.U6, C.U7, C.U9	Exam in the form of a multiple choice test.	Obtaining over 55% points.

9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

1. Students are required to prepare for the course, which will be verified by the student's answer or written test.
2. Students watch microscopic and macroscopic preparations of various forms of development of parasites and make drawings documenting the preparations.
3. Due to contact with invasive material during classes, hygiene instructions should be strictly followed.
4. Attendance at all classes is obligatory, attendance should be on time. Abandoned due to illness should be done with another group after prior agreement with the person responsible for the subject.
5. Students use the workbook "Parasitology - materials for 3rd year students of English Division Medicine" during the practical classes. It is sent in pdf version to students before the beginning of the course.
6. Persons applying for transfer of the subject from previous years or from another university should write an application to the Head of the Department of General Biology and Parasitology and obtain permission of the Faculty Dean.

3. COURSE OBJECTIVES	
O1	The third year Polish language course is designed to improve the students' command of the medical language skills and practise history taking and giving instructions to the patient in definite clinical situations.

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning

(*in accordance with appendix to Regulation of Minister of Science and Higher education from 26th of July 2019*)

Effects in time

Knowledge – Graduate* knows and understands:

D.W6

the importance of verbal and non-verbal communication in the process of communicating with the patient and the concept of trust in interaction with the patient.

Skills– Graduate* is able to:

D.U18

communicate with the patient in one of the foreign languages at B2+ level of the Common European Framework of Reference for Languages

* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

5. ADDITIONAL EFFECTS OF LEARNING (*non-compulsory*)

Number of effect of learning

Effects of learning in time

Knowledge – Graduate knows and understands:

K1

The names of the most common diseases and their symptoms in Polish language

K2

Skills– Graduate is able to:

S1

conduct a 'basic' bedside conversation and a more detailed conversation with patients affected by the diseases discussed during the III year Polish language course (i.e. ask and answer questions during the medical interview (pertaining to personal history, history of the presenting complaint, past history, family history, drug history, social history, systemic inquiry)

S2

give instructions for the clinical examination of adult and paediatric patients and explain the doctor's intentions;

S3

inform the patient as to what diagnostic investigations need to be done.

Social Competencies – Graduate is ready for:

SC1

continually broadening their knowledge.

SC2

6. CLASSES		
Form of class	Class contents	Effects of Learning
Seminars	Seminar 1 (e-learning platform) - Introduction to oncogenetics. Carcinogenesis, oncogenes and suppressor genes.	CW4
	Seminar 2 - The most important advances in cancer genetic research in the last decade. A brief history of cancer genetics research from Rous sarcoma virus to targeted therapy and personalized oncology. Precision medicine, actionable mutations and "moonshot" in oncology.	C.W4; C.W7
	Seminar 3- Hereditary cancers: genetic predisposition to cancer development; recommendations for diagnostics and prevention. Selected cases and genetic testing revealing the genetic basis of hereditary cancers.	C.W7; C.W9; K1
	Seminar 4- Sporadic cancers: molecular targets for personalized medicine and application of high-throughput analyses. Integration of molecular data in diagnostics, tumors classification and targeted treatment.	C.W7; C.W9; K2
	Seminar 5 - The importance of genetic tests in modern hematooncological diagnostics on the example of selected myeloid and lymphoid neoplasms. Analysis of test results on clinical examples, interpretation of the obtained results with the use of available databases.	C.W9; C.U3
Classes	1. Diagnosis of hematologic malignancies based on molecular techniques. From blood smear/ bone marrow smear to single gene analysis in differential diagnosis of hematologic malignancies. 2. Basic methods in molecular biology used in hemato-oncology: blood/bone marrow collection, extraction of nucleic acids, RT-PCR, RT-qPCR, fragment analysis, Sanger sequencing, ddPCR. 3. Monitoring of fusion genes to assess the effectiveness of targeted therapy based on Chronic Myeloid Leukemia example	C.W9; C.U3

7. LITERATURE

9. ADDITIONAL INFORMATION (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

The subject is closely related to genetic research conducted at the Medical University of Warsaw and diagnostically to the UCK Medical University of Warsaw. The presented clinical cases are examples from our own research and diagnostics activity.

Classes are held in weekly blocks from Monday to Friday.

The course's detailed rules and the detail plan will be available on the website:

<https://onkogenetyka.wum.edu.pl/en>

in the beginning of the semester.

The colloquium is planned to be arranged with the use of computer rooms of the Teaching Center. The test consists of 20 MCQ questions.

In case of failure to obtain credit in two terms, the student has the option of applying for a commission term (with the consent of the Head of the Department).

The additional 3rd term (commission colloquium) may be either test or oral (depending on certain factors, such as number of students and the recommendation of the Dean) and is held in accordance with the rules of examinations and credits of the Medical University of Warsaw.

CONSULTATIONS are possible after making an appointment with the teacher via e-mail.

9. ADDITIONAL INFORMATION (<i>information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club</i>)
Lectures:

Cardiovascular disease risk assessment and management (2 hrs).

Imaging studies in the clinical practice (2 hrs).

Symptoms and signs of endocrine disorders. (2 hrs)

Diabetes mellitus – classification, diagnosis and complications. Metabolic syndrome. (2 hrs)

Laboratory tests interpretation (2 hrs).

At the first day of the course we meet at the entrance of the clinic (The Department of Endocrinology, Diabetology and Internal Medicine – Kondratowicza Street 8, building C, 7th floor) at 8:00 a.m. Then we present the detailed schedule of classes. Some seminars and classes may be conducted as e-learning, depending on epidemiological situation.

3. COURSE OBJECTIVES

O1	Student acquires skills and knowledge on the psychological aspects of the medical patient care, is familiar with the concept of health-related quality of life and understands psychosocial consequences of hospitalization and chronic illness.
O2	Student understands and is able to identify psychosocial risk factors of somatic diseases, knows the mechanisms of human functioning in health and illness (including terminal disease)

03	Student gets familiar with a problem of abuse and basic methods of psychological intervention
04	Student understands the elements of the patient's perspective, knows how to diagnose the patient's attitude toward illness and treatment; is familiar with motivational interviewing and health promotion methods
05	Student learns how age and age-related developmental needs can affect delivery of care and responses to illness and how to respond to them effectively
06	Student knows the signs of work stress and burnout and is familiar with available preventive methods

4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning
(in accordance with appendix to Regulation of Minister of Science and Higher education from 26th of July 2019)

Effects in time

Knowledge – Graduate* knows and understands:

D.K1	social dimension of health and illness, the impact of the social environment (family, social networks) and social inequalities as well as socio-cultural differences on health, as well as the role of social stress in health and self-destructive behaviour
D.K2	social factors influencing behaviour in health and disease, especially in chronic disease
D.K3	forms of abuse, models explaining family and institutional abuse, social bases of different forms of abuse and the doctor's role in recognizing it
D.K4	Social approached to the meaning of health, illness, disability and aging in the relation to social attitudes, social consequences of the somatic disease, disability and socio-cultural barriers, and the concept of health related quality of life
D.K7	psychosocial consequences of hospitalization and chronic disease
D.K9	basic human psychological mechanisms of functioning in health and disease
D.K10	the role of the family in the treatment process
D.K11	aspects of adaptation to the disease as a challenging situation, phases of adaptation to threatening situation, including dying and grief
D.K12	the role of stress in etiopathogenesis and progress of the somatic disease and recognizes coping mechanisms
D.K14	the principles of health promotion, its tasks and main lines of action, with particular emphasis on knowledge of the role of elements of a healthy lifestyle
D.K15	the principles of motivating the patient to health promoting behaviours and informing about unfavorable prognosis

Skills– Graduate* is able to:

D.S1	in the whole therapeutic process, include patient's subjective needs and expectations resulting from socio-cultural background
------	--

D.S2	recognize signs of risk and auto destructive behaviours and reacts to them accordingly
D.S3	chooses treatment which minimizes social consequences of the disease for the patient
D.S10	recognizes signs of abuse and its risk factors and reacts accordingly
D.S11	applies basic psychological motivational and supportive interventions

* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

Attendance: Students are required to attend and actively participate in all seminars and classes. In case of an excused absence (max. 1 during the course) students are obliged to make up missed work. In such cases students should notify the teacher as soon as possible to establish the way of covering the absence. Change of subgroups is possible only after consulting the teacher in advance.

Students are expected to come to the class on time. Being late for over 15 minutes counts as an absence. Recurring tardiness will result in additional work – an essay or short review of literature (based on the decision of the teacher, depending on the missed material).

To provide good learning environment for everyone, students are requested to turn off any electronic devices that might disturb the class.

Test: The final test takes place during the last seminar (7th week from the beginning of the course) and it consists of a case study (an analysis of a patient on a basis of short open questions) and two theoretical open questions.

3. COURSE OBJECTIVES	
O1	The aim of the course is to provide students with opportunity to develop skills in building proper doctor-patient relationship through medical communication, as well as to increase awareness of the student's own communication style.
O2	To improve skills in nonverbal communication during conducting a consult (to raise awareness of student's own non-verbal behaviours and sensitivity to nonverbal cues from a patient).

03	To improve skills in verbal communication during a consult - active listening: discovering patient's perspective, collecting and passing information (including bad news) and including the patient into treatment process and making decisions regarding treatment.
04	To provide practice in applying basic motivational and supportive interventions.
05	To provide practice in group work: delivering and receiving constructive feedback information.
06	To increase empathy by experiencing the role of a patient in a safe learning environment.

D.K5	the rules and methods of communication with the patient and his family, which are used to build an empathic, trust-based relationship
D.K6	the role of good verbal and nonverbal communication in doctor-patient interaction, the meaning of trust in the interaction with patients

Skills– Graduate* is able to:

D.S1	In the whole therapeutic process, include patient's subjective needs and expectations resulting from socio-cultural background
D.S2	recognize signs of risk and auto destructive behaviors and reacts to them accordingly
D.S3	choose treatment which minimizes social consequences of the disease for the patient
D.S4	build the atmosphere of trust during the treatment process
D.S5	conduct the consult with the patient with the use of active listening skills and empathy, and talks to the patient about his life situation
D.S6	inform the patient about the goal, progress and possible risks of suggested diagnostic and treatment methods
D.S7	Involve the patient in the therapeutic process
D.S8	pass bad news to the patient and his/her family
D.S9	passes recommendations and information on health promoting lifestyle
D.S11	apply basic psychological motivational and supportive interventions

8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
D.S1-D.S9, D.S11	Participation in the video-recorded role-playing exercise as a doctor and as a patient.	Minimal acceptable level of performance on the learning outcome
D.K5, D.K6	Preparation of the essay self-evaluating communication skills performed in the role-playing exercise.	Minimal acceptable level of performance on the learning outcome, providing answers to all points included in the instruction.

9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

The class is intended as practical and is based on experiential learning. The outcomes of that process are strongly related to active participation in all in-class activities, therefore attendance is mandatory. Students will be required to make up missed work in case of an excused absence. In such cases students should notify the teacher as soon as possible to establish the way of covering the absence. Change of subgroups is possible only after consulting the teacher in advance and not for the classes for which the particular student's role-playing exercise was scheduled.

Students are expected to come to the class on time and participate actively (in the role-playing exercises as doctors/patients and during discussions). Being late for over 15 minutes counts as an absence. Recurring tardiness will result in additional work – an essay or short review of literature (based on the decision of the teacher, depending on the missed material).

To provide good learning environment for everyone, students are requested to turn off any electronic devices that might disturb the class.

Role-playing

The classes are based on role-playing exercises and each student is required to participate in two role-playing scenes: once as a doctor and once as a patient. Scenarios are delivered to students prior to the class. The role-playing are video recorded (on the student or teacher's equipment). The video is only made available to the participants of a given role-playing exercise.

Essay

To complete the course students are required to write an essay, which presents reflections regarding communication process during the role-play. The paper should be delivered to the teacher within a week from the class on which the particular role-playing exercise took place. Detailed guidelines for this task are provided and discussed during the course.

8. ADDITIONAL INFORMATION (information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)

Students are communicated and updated via e-learning platform: e-learning.wum.edu.pl/en

Seminars, classes and lectures are held at Rectorate building of MUW, Main Library, Didactic Center – Banacha Campus, Żwirki i Wigury 61. Students are obliged to attend all practical classes and seminars with the group assigned only (individual arrangements are to be approved in written (mail) in advance).

After both V and VI semesters students are obliged to complete the final credits in form of MCQ or oral colloquium that covers the scope of classes, seminars and lectures.

Credits of the both tests on V and VI semesters entitle the student to join Clinical Pharmacology subject at the VII semester. Final exam at the end of VII semester covers both pharmacology/toxicology and clinical pharmacology.

Rules on colloquiums and Q&A tests

1. Students are informed about the date/time and the venue for MCQ tests either for semester colloquium or final exam at least one month in advance.
2. Students are expected to arrive at the venue at least 15 minutes before test start. Those who are late more than 15 minutes after the test start are not allowed to enter and are kindly invited for the retake.
3. To facilitate students identification ID document (preferably student record book) need to be presented, otherwise students are not allowed to take the test.
4. Students are asked to wait outside the room and can enter only following identification confirmed.
5. Students are allocated the individual place which is pointed by supervisor.
6. **The test is based on student individual work - unauthorized materials (including revision notes and electronic devices including mobile phones) are disallowed. Communication with any person during the exam, other than the supervisor, is prohibited and can be the cause for student banning.**
7. For MCQ tests only one answer is correct.
8. To pass the test students need to provide 50% + 1 (i.e. 51 for 100 questions) correct answers. The final individual score is based on the number of correct answers provided and other students' performance (the distribution of test results).
9. The form of retake is usually the same as first approach unless number of students for retake determines the feasible form which then is individually decided.
10. Test results are made available on the Department website as soon as possible.

Knowledge – Graduate* knows and understands:

E.W1	environmental and epidemiological conditions of the most common diseases
E.W2	principles of feeding healthy and sick children, including natural feeding, vaccination
E.W3	causes, symptoms, principles of diagnosis and therapeutic management for the most common diseases in children: <ol style="list-style-type: none"> 1) rickets, tetany, fits, 2) heart defects, myocarditis, endocarditis and pericarditis, cardiomyopathy, abnormal heart rhythm, cardiac failure, hypertension, syncope, 3) acute and chronic diseases of the upper and lower respiratory tract, congenital defects of the respiratory tract, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema,

	<ol style="list-style-type: none"> 4) anaemia, bleeding diatheses, marrow failure, cancers in children, including solid tumours typical of childhood, 5) acute and chronic abdomen pain, vomiting, diarrhoea, constipations, alimentary canal bleedings, peptic ulcer disease, non-specific intestine diseases, pancreas diseases, cholestasis and liver diseases and other acquired diseases and congenial defects of the alimentary canal, 6) urinary system infections, congenial defects of the urinary system, nephrotic syndrome, nephrolithiasis, acute and chronic renal failure, acute and chronic renal inflammations, systemic renal diseases, urination disorders, vesicoureteral reflux, 7) growth disturbances, thyroid and parathyroid diseases, adrenal gland diseases, diabetes, obesity, growing pains and disorders of sexual gland functions, 8) cerebral palsy, encephalitis and meningitis, epilepsy, 9) the most frequent infectious diseases in childhood, 10) genetic syndromes, 11) connective tissue diseases, rheumatic fever, juvenile arthritis, systemic lupus, dermatomyositis
E.W6	most common life-threatening conditions in children and rules of conduct in these states;

Skills– Graduate* is able to:

E.U2	conduct a medical interview with the child and his or her family
E.U4	perform a physical examination of the child at any age
E.U7	assess the patient's general condition, state of consciousness and awareness
E.U9	compare anthropometric and blood pressure measurements with the data on the growth charts
E.U10	assess the stage of puberty
E.U11	Perform and understand developmental screenings
E.U12	perform a differential diagnosis of the most common diseases of adults and children
E.U13	assess and describe the patient's somatic and mental state
E.U14	recognize states of immediate danger to life
E.U27	Qualify the patient for vaccination;
E.U29	<p>perform basic procedures and medical procedures:</p> <ol style="list-style-type: none"> 1) body temperature measurement, pulse count and non-invasive blood pressure check, 2) vital signs monitoring with the aid of a pulse oximeter and cardiac monitor, 3) spirometry, oxygen therapy, manual ventilation and basics of mechanical ventilation, 4) oro- and nasopharyngeal airway device placement, 5) intravenous, intramuscular, subcutaneous injections, intravenous cannulation, venous blood sampling, blood culture taking, arterial and capillary blood sampling, 6) nasal, pharyngeal and skin swab taking, 7) male and female urinary bladder catheterisation, nasogastric tube placement, stomach lavage, enema,

	8) standard resting electrocardiogram with adequate interpretation, electrical cardioversion and defibrillation, 9) simple strip test and blood glucose check
E.U38	keep patient's medical records

VOCATIONAL TRAINING

Internal Medicine – 4 weeks – 140h
3rd year, 6-year program ED students
Faculty of Medicine

The summer clinical clerkships are mandatory for students to be assigned a pass for the whole year's academic performance since they are an inherent part of the medical instruction provided throughout the year of study.

Upon completion of the third year students are required to have one-month clinical clerkships at a teaching hospital in Poland or selected foreign countries.

The curriculum of clinical clerkship comprises:

a four-week training in the internal medicine ward.

The head of the ward or an appointed assistant is responsible for providing a detailed program of the training and scheduled duties as well as supervision of students' clinical performance.

Students carry out the work which is that of a regular physician and are supervised by a physician in charge.

During the training students are obliged to have four twenty-four-hour shifts (two on each ward) when they accompany the doctor on duty while he/she performs all the necessary clinical activities and procedures.

The goal of the clinical instruction is to make a practical use of the knowledge acquired in the course of the study e.g., bacteriology, virology, pathomorphology, pathophysiology, pharmacology, and particularly of the clinical subjects i.e. introduction, to medicine and pediatrics.

The clinical instruction should include the following aspects:

- information about the organization of medical ward and their cooperation with the outpatients' department,
- further improvement in taking histories and performing physical examination,
- particularly concerned with assessment of patients' general condition and their psychology,
- planning and collecting specimens for accessory investigations and interpretation of the results,
- improving the skills in differentiating and diagnostic basic clinical entities, particularly
- acute cases, and principles of treatment,
- providing first aid,
- performing everyday clinical procedures (injections and intravenous infusions, catheterization, lumbar puncture, bone marrow puncture and paracentesis of the body cavities), participation in ward rounds and consultations by other specialists

Throughout the course of the training students are expected to make records of their activities and procedures performed. They are also assessed by the instructor in charge and are finally granted their passing mark by the head of the department. Certificates written in English or translated should be submitted to the Dean's Office of the Medical University of Warsaw by October 5th of the subsequent academic year.
