## **AUTHORITIES OF MEDICAL UNIVERSITY OF WARSAW – TERM 2020-2024**

**Rector** – Professor Zbigniew Gaciong, MD, PhD

**Vice Rector for Student Affairs and Education** – Professor Marek Kuch, MD, PhD

**Vice Rector for Science and Technology Transfer** – Professor Piotr Pruszczyk, MD, PhD

**Vice Rector for Human Resources** – Professor Agnieszka Cudnoch-Jędrzejewska, MD, PhD

**Vice Rector for Clinical Affairs and Investments** – Professor Wojciech Lisik, MD, PhD

**Vice Rector for International Relations, Development and Promotion** – Professor Paweł Włodarski, MD, PhD

## **FACULTY AUTHORITIES OF MEDICAL UNIVERSITY OF WARSAW – TERM: 2020-2024**

**Faculty of Medicine** – Professor Rafał Krenke MD, PhD

**English Division – Faculty of Medicine** – Assoc. Prof. Jacek Sieńko, MD, PhD.

## **DEAN’S OFFICE**

**Head of the Dean’s Office** – Krystyna Jarzab, MA

**Student Administration Officer (1st, 2nd and 3rd -Year)** – Aleksandra Chilecka

**Student Administration Officer (4th, 5th, 6th -Year)** – Anna Rosa, MA

## **STUDENT GOVERNMENT REPRESENTATIVES:**

**President** – Catherine Gartside

**Vice President** – Michail Koutentakis

**Secretary** – Rakesh Roshan

**Student Rights’ Representative** – Loay Alayoubi

**Social Media Coordinator** – Ishani Khanna

**Events Coordinator** – Divil Amarnani, Alexis Vourtsis

**Academic Affairs Coordinator** – Flynn Ott

**www:** <https://edsgwum.wixsite.com/edsg>

## **CLASS REPRESENTATIVE:**

Aleksandra Pissa – 5 year

## SCHEDULE – ACADEMIC YEAR 2023/2024

### 6-year program

#### **WINTER SEMESTER – 01.10.2023 – 18.02.2024**

STUDENT'S ACADEMIC CLASSES: 01.10.2023 – 17.12.2023

02.01.2024 – 28.01.2024

WINTER HOLIDAYS: 18.12.2023 – 01.01.2024

**EXAM SESSION: 29.01.2024 – 04.02.2024**

DAYS OFF BETWEEN SEMESTER: 05.02.2024 – 11.02.2024

RETAKE EXAM SESSION: 12.02.2024 – 18.02.2024

#### **SUMMER SEMESTER – 19.02.2024 – 30.09.2024**

STUDENT'S ACADEMIC CLASSES: 19.02.2024 – 28.04.2024

06.05.2024 – 09.06.2024

SPRING HOLIDAYS: 29.04.2024 – 05.05.2024

DAYS OFF BEFORE EXAM SESSION: 10.06.2024 – 16.06.2024

**EXAM SESSION: 17.06.2024 – 07.07.2024**

SUMMER HOLIDAYS: 08.07.2024 – 30.09.2024

RETAKE EXAM SESSION: 02.09.2024 – 15.09.2024

# Curriculum of the 5<sup>th</sup> year of 6-year 2023/2024 ED program and the list of contents

## 5th year

page	subject	form of credit	semester	Total no of hours	including				ECTS

## 2. BASIC INFORMATION

Year and semester of studies	V year, IX semester	Number of ECTS credits	3.00
FORMS OF CLASSES		Number of hours	ECTS credits calculation
Contacting hours with academic teacher			
Lecture (L)			
Seminar (S)		20	0.4
Discussions (D)		40	1.6
e-learning (e-L)			
Practical classes (PC)			

Work placement (WP)		
<b>Unassisted student's work</b>		
Preparation for classes and completions	30	1

<b>3. COURSE OBJECTIVES</b>	
O1	Knowledge and practical skills in advanced cardiopulmonary resuscitation based on most recent guidelines
O2	Knowledge and practical skills in recognition and management of life threatening conditions
O3	Knowledge of pain management in diverse clinical scenarios
O4	Knowledge of pre-operative management of a surgical patient
O5	Knowledge of fundamentals of general and regional anesthesia
O6	Understanding perioperative monitoring
O7	Understanding indications for intensive care treatment
O8	Understanding of futile therapy in intensive care
O9	Knowledge and practical skills in management of respiratory failure

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b>	
<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
<b>Knowledge – Graduate knows and understands:</b>	
E.W6.	the most common life threatening conditions in children and the management of these conditions
E.W29.	principles of pain management, including in cancer and chronic pain
E.W41.	capabilities and limitations of laboratory testing in emergencies
F.W4.	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation
F.W5.	post-operative treatment with analgesic therapy and postoperative monitoring
F.W6.	indications for and principles of use of intensive care
F.W7.	applicable recommendations concerning resuscitation of newborns, children and adults;
F.W15.	principles of suspecting and recognizing the brain death

C.W29.	definition and pathophysiology of shock, especially the differential diagnosis of shock and multiorgan failure
--------	--

**Skills– Graduate is able to:**

E.U13.	assess and describe the patient's somatic and psychological states
E.U16.	plan diagnostic, therapeutic and preventive treatment
E.U18.	propose the individualization of applicable therapeutic guidelines and alternative treatment in the case of ineffectiveness or contraindications to standard therapy
E.U21	recognize the conditions in which life expectancy, functional patient state or preferences limit the treatment according to the guidelines for a given disease
E.U24.	interpret laboratory test results with the identification of reasons for deviation
E.U25.	use feeding protocols (enteral and parenteral)
E.U29.	perform the basic medical procedures, including: <ul style="list-style-type: none"> <li>1) body temperature measurement, pulse count and non-invasive blood pressure check,</li> <li>2) vital signs monitoring with the aid of a pulse oximeter and cardiac monitor,</li> <li>3) spirometry, oxygen therapy, manual ventilation and basics of mechanical ventilation</li> <li>4) oro- and nasopharyngeal airway device placement</li> <li>5) intravenous, intramuscular, subcutaneous injections, intravenous cannulation, venous blood sampling, blood culture taking, arterial and capillary blood sampling,</li> <li>6) nasal, pharyngeal and skin swab taking,</li> <li>7) male and female urinary bladder catheterisation, nasogastric tube placement, stomach lavage, enema,</li> <li>8) standard resting electrocardiogram with adequate interpretation, electrical cardioversion and defibrillation,</li> <li>9) simple strip test and blood glucose check.</li> </ul>
E.U32.	plan specialist consultations
E.U33.	initiate the basic management in acute poisoning
E.U34.	monitor the patient's condition in acute chemical or medication poisoning
E.U37.	properly manage traumas (place a bandage, immobilize, manage and suture wounds)
E.U38.	keep a patient's medical records.
F.U5.	place a venous access
F.U10.	perform basic life resuscitation with automated external defibrillation devices and other resuscitation measures, as well as first aid
F.U11.	perform resuscitation according to the latest advanced guidelines
F.U12.	monitor perioperative care with the aid of basic vital signs;
F.U21.	assess an unconscious patient according to the international point scales

**5. ADDITIONAL EFFECTS OF LEARNING**

Number of effect of learning	Effects of learning in time
<b>Knowledge – Graduate knows and understands:</b>	
D.W5.	rules and methods of communication with patients and their family that contribute to development of an empathic relationship, based on trust
D.W14.	rules of promotion of health, its objectives and main directions of operation, with a special focus on the awareness of healthy lifestyle
G.W11.	principles of the medical privilege, keeping medical documentation and penal, civil and professional liability of a medical doctor
<b>Skills– Graduate is able to:</b>	
D.U1.	include patient's subjective needs and expectations resulting from the socio-cultural background in the entire therapeutic process
D.U5.	conduct an interview with an adult patient, a child and the family with empathy and listeni actively; is able to discuss the patient's life situation
D.U13.	respect ethical standards in professional activities
D.U15.	observe patient rights
D.U16.	assume the responsibility for improving his/her qualifications and teaching other people
D.U17.	critically analyze the medical bibliography (also in English) and draw conclusions
<b>Social Competencies – Graduate is ready for:</b>	
SC1	Developing and maintaining a deep and respectful contact with a patient, demonstrating understanding of differences in belief and culture
SC2	Being guided by the patients wellbeing, placing it first line
SC3	Keeping doctor-patient confidentiality and patient's rights
SC4	Making decisions for patients based on ethical principles, with the understanding of their social background and limitations resulting from the disease
SC5	Observing and identifying own limitations and assessing personal deficits and educational Leeds
SC6	Propagating health behaviours
SC7	Using objective sources of information
SC8	Formulating conclusions based on personal measurements and observations
SC9	Introducing rules of professional relations and teamwork among specialists, inclusive of representatives from other medical specialties, also in a multicultural and multinational environment
SC10	Formulating opinions regarding different aspects of professional activity
SC11	Taking responsibility for decisions made during professional activities, inclusive of self and others safety

6. CLASSES		
Form of class	Class contents	Effects of Learning
Seminars		
S1	Preparation for surgery, general anesthesia and postoperative monitoring of a patient	E.W41, F.W4, F.W5, E.U13, E.U16, E.U32, F.U12, D.W5, D.W14, D.U1, D.U5, D.U13, D.U14, D.U15, D.U16, D.U17, G.W11
S2	Principles of safe use of local anesthetics. Regional anesthesia: peripheral nerve blocks	F.W4, E.U32
S3	Regional anesthesia: central nerve blocks	F.W4, E.U32
S4	Perioperative pain management	E.W29
S5	Principles of intensive care: indications. Futility of therapy. Brain death.	F.W6, F.W15, E.U18, E.U21, E.U24, E.U25
S6	Respiratory failure: management	F.W6.
S7	Shock and sepsis: management. Cannulation.	C.W29.
S8	Management of life threatening conditions in children	E.W6
Practical classes		
C1	Advanced Life Support (ALS) SIMULATION CENTRE	F.W7.
C2	Management of life threatening conditions. Point of care ultrasonography in anesthesiology, intensive care and emergency states SIMULATION CENTRE	E.U29, E.U33, E.U34, E.U37, F.U5, F.U10, F.U11, F.U21
C5 C6 C7 C8	Practical classes in operating theatres	F.W4, F.U5
C9	Practical classes in the postoperative and recovery units	E.U38, F.U5, F.U12
C10	Practical classes in the intensive care unit	E.U38, E.U16, E.U24

7. LITERATURE
<b>Obligatory</b>
<ol style="list-style-type: none"> <li>European Resuscitation Council (ERC) 2021 Advanced Life Support (ALS) guidelines <a href="http://www.erc.edu">www.erc.edu</a></li> <li>2011 and 2022 European Society of Anesthesiology and Intensive Care (ESAIC) perioperative fasting in adults and children <a href="https://journals.lww.com/ejanaesthesiology/Fulltext/2011/08000/Perioperative_fasting_in_adults_and_children_4.aspx">https://journals.lww.com/ejanaesthesiology/Fulltext/2011/08000/Perioperative_fasting_in_adults_and_children_4.aspx</a> <a href="https://www.esaic.org/uploads/2022/01/pre_operative_fasting_in_children_a_guidelin.pdf">https://www.esaic.org/uploads/2022/01/pre_operative_fasting_in_children_a_guidelin.pdf</a></li> <li>2022 Joint ESAIC/ESRA guidelines on regional anaesthesia in patients on antithrombotic drugs: <a href="https://www.esaic.org/uploads/2022/01/regional_anaesthesia_in_patients_on_antithrom.pdf">https://www.esaic.org/uploads/2022/01/regional_anaesthesia_in_patients_on_antithrom.pdf</a></li> <li>Surviving Sepsis Campaign: International Guidelines for Management of Sepsis and Septic Shock 2021: <a href="https://www.sccm.org/Clinical-Resources/Guidelines/Guidelines/Surviving-Sepsis-Guidelines-2021">https://www.sccm.org/Clinical-Resources/Guidelines/Guidelines/Surviving-Sepsis-Guidelines-2021</a></li> <li>Acute Respiratory Distress Syndrome: The Berlin Definition <a href="https://jamanetwork.com/journals/jama/article-abstract/1160659">https://jamanetwork.com/journals/jama/article-abstract/1160659</a></li> <li>"Anesthesia Student Survival Guide" Jesse M Ehrenfeld; Scott Segal; Richard D Urman 2010 (available via <a href="http://www.biblioteka.wum.edu.pl">www.biblioteka.wum.edu.pl</a>)</li> <li>"Basic Clinical Anesthesia" Paul K Sikka; Shawn T Beaman; James A Street 2015 (available via <a href="http://www.biblioteka.wum.edu.pl">www.biblioteka.wum.edu.pl</a>)</li> </ol>
<b>Supplementary</b>

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
E.W6 E.W29 E.W41 F.W4 F.W5 F.W6 F.W7 F.W15 C.W29 E.U13 E.U16 E.U18 E.U21 E.U24 E.U25 E.U29 E.U32 E.U33 E.U34 E.U37 E.U38 F.U5 F.U10 F.U11 F.U12 F.U21 D.W5 D.W14 G.W11 D.U1 D.U5 D.U13 D.U14 D.U15 D.U16 D.U17 K1-4	Student presence card – activity and presence will be noted in the card during classes. Short entry tests based on materials provided prior to class before each seminar may be done (10 questions)	Acquiring knowledge from lectures in given anesthesia department. Presence during classes and active participation confirmed by educator. Pass of short test with at least 7 correct answers; in case of failure – repeat oral colloquium with assistant until pass.
E.W6 E.W29 E.W41 F.W4 F.W5 F.W6 F.W7 F.W15 C.W29 E.U13 E.U16 E.U18 E.U21 E.U24 E.U25 E.U29 E.U32 E.U33 E.U34 E.U37 E.U38 F.U5 F.U10 F.U11 F.U12 F.U21 D.W5 D.W14 G.W11 D.U1 D.U5 D.U13 D.U14 D.U15 D.U16 D.U17 K1-4	Practical assessment by assistant during cardiopulmonary resuscitation Entry test before simulation center class may be done (10 questions)	Competence in advanced life support. Pass of entry test with at least 7 correct answers. In case of failure – a repeat oral colloquium with assistant/lecturer until pass.
E.W6 E.W29 E.W41 F.W4 F.W5 F.W6 F.W7 F.W15 C.W29 E.U13 E.U16 E.U18 E.U21 E.U24 E.U25 E.U29 E.U32 E.U33 E.U34 E.U37 E.U38 F.U5 F.U10 F.U11 F.U12 F.U21 D.W5 D.W14 G.W11 D.U1 D.U5 D.U13 D.U14 D.U15 D.U16 D.U17 K1-11	Final examination – test consisting of true/false questions in computer lab	RESULTS: 2.0 (fail) <70% correct 3.0 (satisfactory) 70-73% 3.5 (rather good) 74-76% 4.0 (good) 77-79% 4.5 (more than good) 80-82% 5.0 (very good) 83+%

## 9. ADDITIONAL INFORMATION

During the practical classes and on contact with patients, we recommend medical clothing with short sleeves. Please do not wear private clothing. In case of using a white apron on personal clothing, the apron should be fastened. Long hair should be pinned back. It is necessary to change to theatre applicable footwear with adherence to safety rules. During practical classes in areas with patients – the rule “nothing below elbow” should be applied – that is watches, jewelry should be taken off. The “5 moments of hand hygiene” should be applied. Diagnostic medical gloves should be donned only after cleaning and/or disinfection of hands, directly before patient contact.

Students unprepared for classes may not be allowed to attend: mini tests will be conducted.

PUNCTUALITY is mandatory.

Detailed information on the conduct and plans of the classes will be provided in electronic form or during the first class in the assigned department.

Groups are divided to be under the primary care of the 1<sup>st</sup> Department (Lindleya) or the 2<sup>nd</sup> Department (Banacha); please check the master program provided by the deanery which group is allocated to a given department; group swaps are not allowed after the start of the classes and students will be allowed to change Departments only in exceptionally rare cases.

Access to materials will be made available via the electronic platform [www.e-learning.wum.edu.pl](http://www.e-learning.wum.edu.pl)

Login details are the same as for the SSL-WUM platform

Identifier: (s0 + album number): s0XXXXX

Password: the same as for SSL-WUM

Additional materials necessary for seminars, practical classes and entry tests will be made available electronically.

A student presence card is mandatory and must be submitted to the department secretariat. Presence during all classes must be noted in the student card and at the end of the classes must be brought back to the secretariat. All issues related to the absence must be reported to the Head of the given department or to the course coordinator, Marek Janiak/Łukasz Wróblewski.

Form of credit: written final test and practical skills assessment in ALS. In cases of exam failure, a second term will be given in the form of an oral exam arranged with an assistant from the given Anesthesiology Department.

The property rights, including copyrights, to the syllabus are vested in the Medical University of Warsaw. The syllabus can be used for purposes related to education during studies at the Medical University of Warsaw. The use of the syllabus for other purposes requires the consent of the Medical University of Warsaw.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## Neurology

### 1. IMPRINT

<b>2. BASIC INFORMATION</b>			
<b>Year and semester of studies</b>	5 year, first ( winter) semester	<b>Number of ECTS credits</b>	5.00
<b>FORMS OF CLASSES</b>		<b>Number of hours</b>	<b>ECTS credits calculation</b>
<b>Contacting hours with academic teacher</b>			
Lecture (L)			
Seminar (S)		30	1,5
Classes (C)		70	3
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
<b>Unassisted student's work</b>			
Preparation for classes and completions		15	0.5

<b>3. COURSE OBJECTIVES</b>	
O1	etiology and symptoms of neurologic diseases which they can deal with during their work as general practitioner (family doctor)
O2	diagnostic procedures and tests used in neurology and interpretation of their results
O3	management of the most common neurological diseases

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b> <i>(concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)</i>	
<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>

**Knowledge – Graduate\* knows and understands:**

G.K1/ E.W1	environmental and epidemiological conditions of the most common diseases
G.K2/ E.W13	basic syndromes of neurological symptoms
G.K3/ E.W14	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases of the nervous system, including: 1) headaches: migraine, tension headache, headache syndromes and V nerve neuralgia, 2) cerebral vascular diseases, especially stroke, 3) epilepsy, 4) infections of the nervous system, in particular meningitis, Lyme disease, herpetic encephalitis, neurotransmission diseases, 5) dementia, in particular Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes, 6) diseases of the basal ganglia , in particular Parkinson's disease, 7) demyelinating diseases, in particular multiple sclerosis, 8) diseases of the neuromuscular system, in particular amyotrophic lateral sclerosis and sciatica, 9) craniocerebral injuries, in particular concussion;
G.K4/ E.W42	indications for the implementation of monitored therapy

**Skills– Graduate\* is able to:**

G.S1/ E.U1	conduct a medical interview with an adult patient;
G.S2/ E.U3	conduct a complete and targeted physical examination of an adult patient;
G.S3/E.U7	assess the general condition, state of consciousness and awareness of the patient;
G.S4/ E.U12	carry out differential diagnosis of the most common diseases of adults and children;
G.S5/ E.U14	recognize life-threatening states;
G.S6/ E.U15	recognize the condition after consuming alcohol, drugs and other stimulants;
G.S1/ E.U16	plan diagnostic, therapeutic and prophylactic procedures;

G.S7/ E.U20	qualify the patient for home and hospital treatment;
G.S8/ E.U21	identify conditions in which the life expectancy, functional state or patient preferences limit the management of the guidelines defined for the given disease
G.S9/ E.U24	interpret the results of laboratory tests and identify the causes of deviations from the norm
G.S10/ E.U30, 5	assist in the following medical procedures and procedures: a lumbar puncture

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

<b>5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)</b>	
<b>Number of effect of learning</b>	<b>Effects of learning in time</b>
<b>Knowledge – Graduate knows and understands:</b>

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>
SEMINARS	<p>They discuss the symptoms, diagnosis and treatment of the most common neurological diseases and syndromes.</p> <p>The topics of the seminars include:</p> <ol style="list-style-type: none"> <li>1. Anatomy and physiology of the Central and Peripheral Nervous System- repetition</li> <li>2. Hemorrhagic stroke and subarachnoid hemorrhage</li> <li>3. Ischemic stroke</li> <li>4. Management of ischemic stroke</li> <li>5. Motor neuron disease and other spinal cord diseases</li> <li>6. Skeletal muscle diseases</li> <li>7. Myasthenia and disorders of the neuromuscular junction</li> <li>8. Peripheral neuropathies</li> <li>9. Demyelinating diseases</li> <li>10. Back pain - diagnosis and management</li> <li>11. Vertigo- diagnosis and management</li> </ol>	G.K1, G.K2., G.K3, G.K4

	12. Headache - diagnosis and management 13. Neoplastic tumors of the nervous system 14. Epilepsy 15. Traumatic lesion of the nervous system 16. Movement disorders 17. Dementias 18. Neurological signs and symptoms in systemic diseases and general medicine 19. Brain death and neurocritical care	
Practical training	1. teaching physical neurological examination, 2. interpretation of diagnostic tests and algorithms of diagnostic procedure, 3. demonstration of patients with selected neurological diseases 4. demonstration of basic additional tests used in neurological diagnostics: Doppler ultrasound examination, neuroimages, EMG, EEG	G.S1, G.S2, G.S3, G.S4, G.S5, G.S6, G.S7, G.S8, G.S9, G.S10,

<b>7. LITERATURE</b>
<b>Obligatory</b>
<p>“Lange Clinical Neurology”, Greenberg D, Aminoff M, Simon R. edition 11, Mc Graw Hill Education 2020</p> <p>The manual has not been updated since 2020. In the event of discrepancies, the information from the annually updated seminars shall apply.</p>
<b>Supplementary</b>
1. “Neurology and Neurosurgery Illustrated” K.W.Lindsay, I.Bone. Churchill Livingstone 2010 2. “Clinical neuroanatomy” R.S Snell, 8 edition. Lippincott Williams & Wilkins, a Wolters-Kluwer.2022 3. “Mosby’s Color Atlas and Text of Neurology”. Perkin DG; Times Mirrors Int. Publishers Ltd 1998

8. VERIFYING THE EFFECT OF LEARNING		
Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
G.S2	Practical skills examination	Positive evaluation of the teaching assistant
G.K1, G.K2., G.K3, G.K4	Final colloquium ( 50 MCQ and open questions).	threshold number of points - 30 good answers
G.K1, G.K2., G.K3, G.K4 G.S1, G.S3, G.S4, G.S5, G.S6, G.S7, G.S8, G.S9, G.S10,	Final exam in winter exam session ( 100 MCQ)	exam threshold = 56 good answers  thresholds for individual grades: <ul style="list-style-type: none"><li>• grade 3.0 = 56-64 good answers</li><li>• grade 3.5 = 65-73</li><li>• grade 4.0 = 74-82</li><li>• grade 4.5 = 83-91</li><li>• grade 5.0 = 92-100</li></ul>

<b>9. ADDITIONAL INFORMATION</b> ( <i>information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club</i> )
<ul style="list-style-type: none"> <li>Duration of the neurology course: 3 weeks (from Monday to Friday)</li> </ul>

- During the course it is possible to be absent only once .The student makes up for this absence in the form determined by the assistant (presence on duty, writing a paper etc.)
- If a student has 2-3 absences, he/she must make up for them with another group. Only then, the student can take the colloquium, which he/she passes with another group.
- More than 3 absences result in failure to complete a block of classes.

#### **SEMINARS**

The seminars are conducted live by assistants. Seminar outlines and additional self-study materials are available on the e-learning platform.

#### **PRACTICAL TRAINING**

The first week of classes is devoted to teaching neurological examination and demonstrations of clinical cases. In the following weeks, students are divided into subgroups and examine patients under the supervision of designated assistants. In the last week of classes, a practical test of neurological examination skills is carried out.

#### **PRELIMINARY TEST**

The preliminary test takes place on the first day of the course. The test consists of 5 questions and covers the basic knowledge of the anatomy and physiology of the nervous system. The test questions are on the web site: [neurologia1.wum.edu.pl](http://neurologia1.wum.edu.pl)

In the event of a negative result of the test, the student must take it again at the beginning of the second week of classes.

#### **PRACTICAL SKILLS EXAMINATION**

In the last week of the classes, students are checked for their practical skills in neurological examination

#### **FINAL COLLOQUIUM**

On the last day of the course students take the final colloquium consisting of 50 open and multiple choice questions. At least 30 correct answers are required to pass the test. The colloquium can be re-passed only twice. If the results of the repetitive tests are negative, the student must repeat the entire course of neurology.

To credit the neurology course, the student must be present at all classes (with the exception of 1 allowed absence) and have at least a satisfactory (3.0) grade with:

- preliminary test
- practical skills examination
- final colloquium

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

#### **ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## 3. COURSE OBJECTIVES

O1	Diagnostic tests in oncology
----	------------------------------

O2	Epidemiology of cancer
O3	Contemporary cancer therapy
O4	Palliative medicine
O5	Pain care in cancer therapy
O6	The most common cancers - principles of diagnostic and therapeutic procedures

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING** (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning	Effects in time ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019</i> )
--	---

**Knowledge – Graduate\* knows and understands:**

E.W23	The student knows environmental and epidemiological conditions of the most common human cancers
E.W24	The student knows the basics of early detection of tumors and oncology screening principles
E.W25	The student knows the possibilities of contemporary cancer therapy (including multimodal therapy), perspectives of cell and gene therapies and their undesirable effects
E.W26.	The student knows the principles of combined therapies in oncology, algorithms of diagnostic and therapeutic procedures in the most common human cancers
E.W27.	The student knows and understands the causes, symptoms, principles of diagnosis and therapeutic treatment in the most common problems of palliative medicine, including: a. symptomatic treatment of the most common somatic symptoms. b. Proceedings in tumor cachexia and in the prevention and treatment of pressure ulcers
E.W28	The student knows the rules of palliative treatment with the patient in the terminal state
E.W29	The student knows the principles of pain treatment, including cancer and chronic pain

**Skills– Graduate\* is able to:**

E.U1	The student conducts a medical interview with an adult patient
E.U16	The student plans diagnostic, therapeutic and prophylactic procedures
E.U18	The student proposes to individualize the existing therapeutic guidelines and other methods of treatment for ineffectiveness or contraindications to standard therapy
E.U21	The student defines the states in which the duration of life, functional status or preferences of the patient limit the treatment in accordance with the guidelines laid down for a given disease
E.U24	The student interprets laboratory tests and identifies the causes of deviations

E.U30	The student assists in carrying out the following procedures and medical procedures: transfusion of blood and blood derivatives, drainage of the pleural cavity, puncture of the peritoneal cavity, lumbar puncture, fine needle biopsy
E.U31	The student interprets the pharmaceutical characteristics of medicinal products and critically assesses the advertising materials regarding medicines
E.U32	The student plans specialist consultations
E.U38	The student completes the patient's medical records

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

Work placement (WP)			
<b>Unassisted student's work</b>			
Preparation for classes and completions			

<b>3. COURSE OBJECTIVES</b>	
O1	Learning the principles of assessing, differential diagnosis and treatment of general orthopaedics, traumatic and non-traumatic disorders
O2	Learning the basics of an orthopedic physical examination
O3	Improve knowledge of the anatomy, physiology and pathophysiology of the musculoskeletal system

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)</b>	
<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> (in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)  A.W1, A.W2, A.U3, A.U4, F.W1, pts 3&4, F.W2, F.W3, F.W4, F.W5, F.W10, F.W13 pt. 6, E.U.23, F.U.7, F.U.8

<b>Knowledge – Graduate* knows and understands:</b>	
A.W1	appropriate Polish and English anatomical, histological and embryological terminology
A.W2	structure of the human body in the topographical approach (upper and lower limb, chest, abdomen, pelvis, back, neck, head) and the functional approach (skeletal system, muscular system, urinary system, reproductive system, nervous system and sensory system, integumentary system)
F.W.2	specific paediatric surgery, including traumatology, otolaryngology, acquired defects and diseases in children which require surgical treatment
F.W1, 3 & 4	causes, symptoms, principles of diagnosis and therapeutic treatment in relation to the most common diseases requiring surgical intervention taking into account the distinctions of childhood, in particular: 3) limb and head diseases 4) bone fractures and organ injuries
F.W3	rules of qualification and performance, as well as the most common complications of basic surgical procedures and invasive diagnostic and therapeutic procedures
F.W4	principles of perioperative safety, patient preparation for surgery, general and local anaesthesia and controlled sedation
F.W5	post-operative treatment with analgesic therapy and postoperative monitoring
F.W10, 1, 2, 3	problems of contemporary imaging studies, in particular: 1) radiological symptomatology of basic diseases 2) instrumental methods and imaging techniques used to perform therapeutic procedures 3) indications, contraindications and preparation of patients for particular types of imaging examinations and contraindications to the use of contrast agents
F.W.13, 6	causes, symptoms, principles of diagnosis and therapeutic treatment in the case of the most common diseases of the central nervous system in terms of: 6. diseases of the spine and spinal cord
<b>Skills– Graduate* is able to:</b>	
G.S1	Able to assess an x-ray with regards to the most typical fractures, especially long bones
A.U3	explain the anatomical background of the physical examination
A.U4	correlate the relationships between the anatomical structures on the basis of in vivo diagnostic studies, especially medical imaging (X-ray, contrast-enhanced studies, computed tomography, magnetic resonance imaging)
E.U23	propose a rehabilitation programme for the most common diseases
F.U7	assess the result of radiographic studies in terms of the most frequent kinds of fractures, especially long bone fractures
F.U8	immobilise a limb temporarily, choose the kind of immobilisation necessary to be applied in typical clinical cases and control the appropriate blood flow in the limb after an immobilising dressing is put on

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

<b>5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)</b>	
<b>Number of effect of learning</b>	<b>Effects of learning in time</b>

<b>Knowledge – Graduate knows and understands:</b>	
G.W1	health assessment methods of an individual and a population, disease and medical procedure classification
	Understands the causes, typical symptoms, basis for diagnosis and treatment of the most common orthopedic conditions
	Understands basics and specifics of pediatric orthopedics, including trauma, congenital and acquired conditions which may require surgical treatment
<b>Skills– Graduate is able to:</b>	
S1	Student is able to carry out procedures following injuries (dressing or casting, cleaning and suturing a wound)
G.U7	recognise when examining a child the behaviours and symptoms suggesting that the child is a victim of violence
G.U3	interpret the incidence of diseases and disability
<b>Social Competencies – Graduate is ready for:</b>	
SC1	

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>

<b>2. BASIC INFORMATION</b>			
<b>Year and semester of studies</b>	V year, IX and X semester	<b>Number of ECTS credits</b>	3.00
<b>FORMS OF CLASSES</b>		<b>Number of hours</b>	<b>ECTS credits calculation</b>
<b>Contacting hours with academic teacher</b>			
Lecture (L)			
Seminar (S)		25	1
Discussions (D)		25	1
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
<b>Unassisted student's work</b>			
Preparation for classes and completions		50	1

<b>3. COURSE OBJECTIVES</b>	
O1	Adaptation of medical knowledge for the purpose of law
O2	Understanding of death, thanatology, and goals for forensic autopsy.
O3	Understanding different mechanisms of natural and unnatural deaths.
O4	Forensic issues of traumatology.
O5	Forensic toxicology.
O6	Forensic genetics.
O7	Forensic aspects of interpersonal violence and child abuse.

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING** (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning	Effects in time ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019</i> )
--	---

**Knowledge – Graduate\* knows and understands:**

G.W7	the legal obligations with regard to confirmation of death
G.W12	the definition of unnatural death and sudden death and the differences between trauma and injury
G.W13	the legal basis and rules of conduct of the doctor during the examination of the body on crime scene and forensic examination of the body
G.W14	rules of forensic medical diagnostics and giving opinions in cases concerning infanticide and reconstruction of the circumstances of a road accident
G.W15	the rules of forming up opinions as an witness expert in criminal cases
G.W16	the rules of forensic medical opinions regarding the ability to participate in procedural activities, biological effect of trauma and health loss
G.W18	the rules of collecting material for toxicological and hemogenetic research

**Skills– Graduate\* is able to:**

G.U7	to recognize the behavior and symptoms indicating the possibility of violence against a child
G.U9	collect blood for toxicological tests and material for genetic test

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

**5. ADDITIONAL EFFECTS OF LEARNING** (*non-compulsory*)

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

K1	the rules and obligations applied to human cadavers G.W33
K2	issues related to serology and forensic genetics G.W35
K3	basics of forensic toxicology G.W36

**Skills– Graduate is able to:**

S1	evaluate postmortem changes G.U28
S2	asses the effects of facial and skull injuries in terms of criminal and civil proceedings G.U30

**Social Competencies – Graduate is ready for:**

SC1	
SC2	

**6. CLASSES**

Form of class	Class contents	Effects of Learning
Seminar	Introduction to Forensic Medicine. Educational contents: confirmation of death, medico-legal thanatology, post-mortem changes, forensic and hospital autopsy, procedures applied to bodies found at crime scene	G.W 7; G.W 12; G.W 13; G.W 15; G.W 33; G.W 37;
Seminar	Sudden natural death. Educational contents: sudden natural death due to different diseases, autopsy manifestations of different chronic diseases.	G.W 7; G.W 12; G.W15, G.W16; G.W 33; G.W 37;
Seminar	Asphyxia. Educational contents: mechanism of death, different types of asphyxia, autopsy findings in cases of asphyxia	G.W 33; G.W 37;
Seminar	Traumatology. Educational contents: different types of trauma and injuries (blunt force trauma, sharp force trauma, gunshot injuries, death in fire, electrocution, hypothermia)	G.W 16; G.W 33; G.W 37;
Seminar	Traffic injuries. Educational contents: traffic injuries, injuries of various types of road participants (pedestrians, car occupants, car drivers, bicyclists, motorcyclists).	G.W 14; G.W 33;
Seminar	Forensic toxicology. Educational contents: different types of toxins, toxicological examination in forensic medicine, autopsy findings in different types of fatal poisoning	G.W 16; G.W 36;
Seminar	Forensic genetics. Educational contents: basics of forensic genetics.	G.W 37;
Seminar	Child and sexual abuse. Educational contents: injuries indicating child abuse, examination of a rape victim.	G.W 7; G.W 9; G.W 16; G.W 35; G.U 7; G.U 9;
Seminar	Human identification. Educational contents: methods used for an identification of a person of unknown identity, examination of a body remains.	G.W 9; G.W 28; G.W 16; G.W 35;
Practical classes	Medico-legal autopsy of the dead	G.U 9; G.U 28; G.W 37;
Practical classes	Medico-legal autopsy of the dead	G.U 9; G.U 28; G.W 37;
Practical classes	Medico-legal autopsy of the dead	G.U 9; G.U 28; G.W 37;
Practical classes	Medico-legal autopsy of the dead	G.U 9; G.U 28; G.W 37;
Practical classes	Medico-legal autopsy of the dead	G.U 9; G.U 28; G.W 37;
Practical classes	Medico-legal autopsy of traumatic death.	G.U 28; G.U 30; G.W 16; G.W 37;
Practical classes	Medico-legal autopsy of traumatic death.	G.U 28; G.U 30; G.W 16; G.W 37;
Practical classes	Medico-legal autopsy of an unidentified body.	G.U 9; G.U 28; G.W 37;
Practical classes	Medico-legal examination of human body remains (determining the number of individuals, sex, age, stature, body weight, signs of trauma), forming opinion about cause of death.	G.U 9; G.U 28; G.W 16; G.W 35; G.W 37;

## 7. LITERATURE

### Obligatory

1. Handbook of Forensic Pathology V.J.M. DiMaio, S. E. Dana Taylor and Francis Group 2007.
2. Simpson's Forensic Medicine R. Shepherd, Arnold 2003

### Supplementary

1. Encyclopedia of Forensic Sciences J.A.Siegel, P.J. Saukko, 2013 Academic Press
2. Forensic Analysis of the skull M.Y.Iscan, R.P. Helmer, Wiley-Liss

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
G.W7; G.W12; G.W13; G.W14; G.W15, G.W16; G.W18; G.W33; G.W35; G.W36; G.W37;	Continuous assessment in the classroom - on seminars and practical classes, written reports, discussion.	Active participation in the class, 100% attendance (a maximum 2 day of absences during the course could be accepted, however absence on the seminars must be covered by writing an essay covering the topic of a seminar, and absence on autopsies (practical classes) - by assisting in additional autopsy after a regular teaching hours. Positive result of the MCQ test.
		Assessment: 2.0 (failed) - Final test result less than 66%. More than two day of absences during the course, no active participation in seminar classes or classes, lack of basic knowledge in the field of thanatology, opinions and toxicological and genetic diagnostics in forensic medicine.  3.0 (satisf.) - Final test result 66.01-74%. The condition of completing the course is attendance at all classes, participation in exercises and seminars and demonstrating skills in the medical and forensic issues covered by the curriculum at the basic level. 3.5 (more than satisf.) - Final test result 74.01-80%. The condition for obtaining the grade is attendance at all classes, participation in exercises and seminars, and demonstrating skills in medical and forensic issues covered by the curriculum at a level above elementary. 4.0 (good) - Final test result 80.01-88%. Active participation in exercises and seminars and demonstrating the skills of practical application of knowledge in forensic and medical opinions. 4.5 (more than good) - Final test result 88.01-94%. Active participation in exercises and seminars as well as skills in the practical application of knowledge in forensic medical opinions in high level. 5.0 (very good) - Final test result 94.01-100%. Active participation in exercises and seminars and demonstrating the skills of practical application of knowledge in forensic and medical opinion in very high level.

## 9. ADDITIONAL INFORMATION (information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)

1. All classes are held in Forensic Medicine Department facility at Ociski 1 St. in Warsaw.

2. Classes start at 8:30.
3. For practical classes, the student must have his own apron and protective glasses or visor, street shoes are accepted.
4. The use of mobile phones or other recording devices during forensic class **is strictly prohibited**.
5. A student can miss maximum two days of the course, however absence on each lecture **must be covered** by writing an essay covering the topic of a lecture, and absence on autopsy – by assisting in additional autopsy after regular teaching hours. Students can get credit and proceed to the final exam only after completing all Department's requirements. For three late arrivals, the student is obliged to make up an additional autopsy.
6. If student's absences exceed limitations listed above, he/she is required to take a complete course with another group.
7. Examination grades are final, and we do not allow positive ratings to be improved.
8. Any comments or complaints regarding the final test are considered up to 5 working days after publishing the exam results – a visit to the teacher must be arranged before.
9. In case of failed exam the retake is an oral exam.

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

<b>3. COURSE OBJECTIVES</b>	
O1	Gaining knowledge about pathophysiology, symptoms and signs, diagnostics tools and treatment methods for the most common eye disorders
O2	Acquiring the ability to perform Basic ophthalmologic examinations, diagnosing acute ophthalmological disorders and eye injuries
O3	Providing immediate first ophthalmological aid

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b>	
<b>Code and number of the effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
<b>Knowledge – Graduate* knows and understands:</b>	

F.W11	eye diseases, in particular: 1) treatment methods of the most common eye disorders, ophthalmological complications of systemic diseases with their ophthalmological symptomatology and proper procedures to be used in such cases, 2) ophthalmological complications of systemic diseases with their ophthalmological symptomatology and proper procedures to be used in such cases; 3) surgical treatment methods of common eye diseases, 4) Basic groups of medicines used in ophthalmology, their adverse effects and interactions, 5) groups of medicines for general use causing complications, as well as ophthalmological contraindications and the respective mechanism;
F.W3	rules of qualification and performance, as well as the most common complications of Basic surgical procedures and invasive diagnostic and therapeutic procedures;
F.W10 p.3	indications, contraindications and preparation of patients for particular types of imaging examinations and contraindications to the use of contrast agents;
F.W13 p.3	causes, symptoms, principles of diagnosis and therapeutic treatment in the case of the most common diseases of the central nervous system in terms of: 3). cranial-cerebral injuries,
F.W14	basic issue related to transplantology, indications for the transplantation of permanently impaired organs and tissues, as well as the related procedures;

**Skills– Graduate\* is able to:**

F.U19	perform ophthalmic screening tests;
F.U20	recognise ophthalmic conditions that require an immediate specialist aid and provide initial, qualified aid in the case of physical and chemical eye injuries;
F.U3	observe the rules of asepsis and antisepsis;

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

**5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)**

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

K1	
K2	

**Skills– Graduate is able to:**

S1	
S2	

**Social Competencies – Graduate is ready for:**

		67%-60% (33-30 points) – <b>3.0</b> ≤59% (29-0 points) – <b>2.0</b>
F.U19, F.U20, F.U3,	Practical skills examination	Positive evaluation of the teaching assistant
F.W11 F.W3 F.W10 p.3) F.W13 p.3) F.W14 F.U19, F.U20, F.U3,	Quiz and test available on-line at the Medical University of Warsaw e-learning platform	complete activity on e-learning platform

## 9. ADDITIONAL INFORMATION

Seminars are available on-line at the Medical University of Warsaw e-learning platform. Students need to read/listen to the seminars prior to the stationary classes begin.

Classes start the seminar at. 8.30 in the Conference Room on the fourth floor, room 4.43. The cloakroom for students is located on the 4th floor of the hospital rm 4.44).

In special cases, the students will be informed about any organizational changes by e-mail by the starost of the group.

The contact with the Clinic is by e-mail (clinika@spkso.waw.pl or by phone: 22 5116377 (Clinic's office).

Only one absence is acceptable. More absences have to be worked off with a different group.

Medical clothing and changeable footwear are required during the classes. Medical clothing with short sleeves is recommended. In the case of a medical apron worn over private clothing, it should be closed. Jewellery (watches, rings, bracelets, etc.) is not allowed. Nails must not be painted and long hair should be pinned together. Protective gloves should be put on after washing / disinfecting hands immediately before contact with the patient.

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

### ATTENTION

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## Internal Medicine- Diabetology

### 1. IMPRINT

<b>Year and semester of studies</b>	V, classes - winter/spring semester Lectures – spring semester	<b>Number of ECTS credits</b>	2.00
<b>FORMS OF CLASSES</b>		<b>Number of hours</b>	<b>ECTS credits calculation</b>
<b>Contacting hours with academic teacher</b>			
Lecture (L)		4	0.5
Seminar (S)		16	0.5
Classes (C)		10	0.5
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
<b>Unassisted student's work</b>			
Student's preparation for classes and completion		15	0.5

<b>3. COURSE OBJECTIVES</b>	
O1	Improve the skills of history taking and proper physical examination.
O2	Ability to conduct differential diagnosis and to use proper diagnostic path in diabetology
O3	Ability to recognize and treat life-threatening conditions in diabetology Ability to treat and monitor treatment of common types of diabetes

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b> <i>(concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)</i>	
<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i> E.W1, E.W7, E.W40, E.W41, E.U1, E.U3, E.U7, E.U12, E.U13, E.U14, E.U16, E.U18, E.U24, E.U38

**Knowledge – Graduate\* knows and understands:**

G.K1	knows and understands principles of history taking and physical examination (E.W7)
G.K2	knows and understands the causes, symptoms, principles of diagnosis and therapeutic management in relation to the most common internal diseases occurring in adults and their complications: neuropathy, nephropathy, retinopathy, cardiovascular diseases (E.W1, E.W7)
G.K3	knows and understands interpretation of laboratory values and others basic tests (E.W7, E.W40, E.W41)

**Skills– Graduate\* is able to:**

G.S1	take history and perform physical examination of patients with diabetes (E.U1, E.U3, E.U7, E.U13)
G.S2	interpret laboratory tests and imaging tests in diabetes (E.U24)
G.S3	provide differential diagnosis of particular symptoms including metabolic disorders (E.U12)
G.S4	plan diagnostic procedures and treatment in common types of diabetes (E.U16)
G.S5	prepare and analyse clinical cases (E.U13, E.U38)
G.S6	recognize, diagnose and treat life-threatening conditions in diabetology (E.U14)
G.S7	present a patient case to other doctor, consult relevant abnormalities in laboratory and imaging tests (E.U13, E.U14, E.U16, E.U18)

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

<b>7. LITERATURE</b>		
<b>Obligatory</b>		
<ol style="list-style-type: none"> <li>1. Kumar and Clark’s Clinical Medicine , 8e/9e (Kumar, Kumar and Clark’s Clinical Medicine) by Parven Kumar</li> <li>2. Textbook of Diabetes. Ed. by Richard I.G.Holt, Clive Cockram, 5<sup>th</sup> Edition</li> </ol>		
<b>Supplementary</b>		

1. Harrison's Principles of Internal Medicine 20 th edition

**8. VERIFYING THE EFFECT OF LEARNING**

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
G.S1, G.S2, G.S3, G.S4, G.S6	Active participation in all seminars and classes.	Obligatory attendance and active participation in all seminars and classes.
G.K1, G.K2, G.K3	Test at the end of the course – single choice questions.	3.0 (satisfactory)

**EVALUATION CRITERIA**

Form of receiving credit in a subject – score in a final test. In case of absence on final test - written test with the next exercise group; in exceptional circumstances (no other group, no appropriate date), presentation of a clinical case.

Grade	criteria
2.0 (failed)	<60% in SCT
3.0 (satisfactory)	60-65% in SCT
3.5 (rather good)	65-70% in SCT
4.0 good	71-85% in SCT
4.5 more than good	86-89% in SCT
5.0 very good	>90% in SCT

**9. ADDITIONAL INFORMATION** (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

The course take place in the Department of Endocrinology, Diabetology and Internal Medicine – Mazovian Brodnowski Hospital, Kondratowicza Street 8, building C, 7th floor, elevators A and B). Obligatory changing room/cloakroom on -1 floor. In advance the representative of the group will receive the e-mail with detailed schedule of classes.

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## Internal Medicine – Gastroenterology

<b>1. IMPRINT</b>	
<b>Academic Year</b>	2023/2024

## 2. BASIC INFORMATION

<b>Year and semester of studies</b>	5th year, 9 <sup>th</sup> and 10 <sup>th</sup> semester	<b>Number of ECTS credits</b>	2.00
<b>FORMS OF CLASSES</b>		<b>Number of hours</b>	<b>ECTS credits calculation</b>
<b>Contacting hours with academic teacher</b>			
Lecture (L)		4	0,13
Seminar (S)		16	0,53
Classes (C)		10	0,33
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
<b>Unassisted student's work</b>			
Preparation for classes and completions		30	1,00

<b>3. COURSE OBJECTIVES</b>	
O1	The goal of the program is to acquaint students with the prevention diagnosis and treatment of the basic problems in gastroenterology.
O2	During this program all students have seminars and case studies/practical classes.
O3	During practical classes each group has an opportunity to take medical history, examine a patient and discuss all diagnostic tests (biochemical, imaging and endoscopic) with patient's physician. Also, all students have dedicated classes for the observation and participation during various diagnostic and therapeutic endoscopic procedures e.g. gastroscopy, ERCP, colonoscopy, sigmoidoscopy.

#### 4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING

Code and number of effect of learning in accordance with standards of learning	Effects in time <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
	E. W7.3, 9, 10; E. W23; E. W24; E. W28, E. U1; E. U3, E. U7; E.U13; E.U18; E.U21.; E.U24 ;E.U30; E. U32)

#### Knowledge – Graduate\* knows and understands:

EW7 pkt. 3, 9	reasons, symptoms, diagnostic and treatment procedures of the most frequent internal diseases and their complications in adult patients: 3) digestive system diseases, including oral cavity, oesophagus, stomach and duodenum, intestine, pancreas, liver, bile duct and gall bladder diseases, 9) water-electrolytic disturbances and acid-base disturbances, dehydration, hyperhydration, electrolyte imbalance, acidosis and alkalosis;
E.W 10	basic principles of pharmacotherapy in the elderly;
E.W 23	environmental and epidemiological conditions of the most common cancers;
E.W24	basics of early detection of tumours and oncology screening principles;
E.W28	rules of palliative treatment of a patient in the terminal state

#### Skills– Graduate\* is able to:

E.U1	collect medical history from adult patients
E.U3	conduct a complete and targeted physical examination in adults
E.U7	evaluate the general condition, the state of consciousness and awareness of a patient
E.U13	assess and describe the patient's somatic and psychological states
E.U18	propose the individualisation of applicable therapeutic guidelines and alternative treatment in the case of ineffectiveness or contraindications to standard therapy;
E.U21	recognise the conditions in which life expectancy, functional patient state or preferences limit the treatment according to the guidelines for a given disease;
E.U24	interpret laboratory test results with the identification of reasons for deviation;

E.U30 p. 4	assist in the following procedures and medical treatments: 4) peritoneal cavity puncture,
E.U32	plan specialist consultations;

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

<b>5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)</b>	
<b>Number of effect of learning</b>	<b>Effects of learning in time</b>
<b>Knowledge – Graduate knows and understands:</b>	
K1EW7 pkt. 3, 9 E.W23.E.W24.; E.W 28	Knows and understands the causes, symptoms, principles of diagnosis and therapeutic management in relation to the most common internal diseases occurring in adults and their complications; digestive system diseases including diseases of the oral cavity, oesophagus, stomach and duodenum, intestine, pancreas, biliary tract and gallbladder
E.W10; E.W23.E.W24.; E.W 28	Knows and understands the causes, symptoms, principles of diagnosis and therapeutic management in relation to the most common internal diseases occurring in adults and their complications: liver.
<b>Skills– Graduate is able to:</b>	
E. U1; E. U3, E. U7; E.U30. 4	Assists in carrying out the following procedures and medical treatments: puncturing the peritoneal cavity
<b>Social Competencies – Graduate is ready for:</b>	
E.U13E.U18; E.U21.; E.U24., E. U32	Has the ability to recognise and differentiate the common gastrointestinal diseases in adults. Has the ability to order the proper diagnostic tests and treatment.

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>
Lecture	W1- Peptic ulcer disease, gastritis and stomach cancer	
Lecture	W2- Inflammatory bowel diseases	
Seminar	S1 - Diagnostic Approach in Gastroenterology	
Seminar	S2- GI Bleeding	
Seminar	S3 - Peptic ulcer disease, gastritis and stomach cancer	
Seminar	S4 - Diverticular Disease	
Seminar	S5 - Diseases of the Oesophagus and GERD	
Seminar	S6- Diseases of the Gallbladder and Bile Duct	
Seminar	S7 - Functional Disorders of GI Tract	
Seminar	S8 - Diarrhea and Malnutrition	
Seminar	S9 - Acute Pancreatitis	

Seminar	S10 - Chronic Pancreatitis	
Seminar	S11 - Colorectal Cancer	
Seminar	S12 - Acute and Chronic Liver Disease	
Seminar	S13 – Pancreatic Tumor	
Seminar	S14 - Cirrhosis and Its Complications, Liver Transplantation	
Seminar	S15 - Liver Cancer	
Seminar	S16 – Gastrointestinal Endoscopy	
Practical Classes/Online Case studies	C1-5-Practical bedside classes with appointed teacher	

<b>7. LITERATURE</b>
<b>Obligatory</b>
Harrison's Principles of Internal Medicine 20th Edition, Chapters on Gastroenterology and Diabetes
<b>Supplementary</b>
Harrison's Gastroenterology and Hepatology 3rd by Dan L. Longo, Anthony S. Fauci.

8. VERIFYING THE EFFECT OF LEARNING		
Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
E. U1; E. U3, E.U7; E.U30. 4 <i>E.U13E.U18; E.U21.; E.U24., E. U32</i>	Active participation in all seminars and classes.	
EW7 pkt. 3, 9 <i>E.W23.E.W24.; E.W 28; E.W10; E.W23.E.W24.; E.W 28</i>	Single choice test	

<b>9. ADDITIONAL INFORMATION</b> ( <i>information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club</i> )
<p>Department of Gastroenterology and Internal Medicine website:  <a href="http://www.gastroenterologia.wum.edu.pl">www.gastroenterologia.wum.edu.pl</a></p> <p>Venue:  Chair and Department of Gastroenterology and Internal Diseases  SP CSK, 1A Banacha St.,</p>

*Seminars - Block D, Ground Floor, Room no 23, at 8.00 every day.*

*Practical Classes - at the Department, Block D, 3rd Floor.*

*Students who are not vaccinated won't be allowed to attend practical classes. Alternative, case-based classes based will be conducted in Block D, Ground Floor, Room no 23.*

*Abridged Rules of Classes in The Department of Gastroenterology and Internal Medicine:*

Knowledge in anatomy, pathophysiology and pathology of gastrointestinal tract as well as credit in Introduction to Internal Medicine is required.

Punctuality to seminars and practical classes is obligatory.

Students are obligated to wear lab coats/scrubs, have stethoscope and student's ID on every classes.

In case of single excused absence student should attend the class in a form discussed with appointed teacher.

During the time of SARS-CoV-2 pandemic, there will be additional rules determined by university authorities.

Detailed information about classes held in the Department of Gastroenterology and Internal Medicine are available on a board next to Department office. (SP CSK, Block D, 3rd Floor)

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## 3. COURSE OBJECTIVES

O1	Gaining knowledge about diagnostic and therapeutic approach to selected disorders of the kidneys and urinary tract
O2	Theoretical and practical principles of renal replacement therapy (hemodialysis, peritoneal dialysis, kidney transplantation)

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING** (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning	Effects in time ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019</i> )
--	---

**Knowledge – Graduate\* knows and understands:**

G.K1	E.W1 environmental aspects and epidemiology of the most common diseases
G.K2	E.W7 p. 5 causes, clinical manifestation, diagnostic and therapeutic approach to the most common diseases of the kidneys and urinary tract and associated complications in adult population: Acute kidney injury and chronic kidney disease, glomerular diseases, interstitial diseases, renal cysts, nephrolithiasis, urinary tract infections, neoplasms of the urinary tract, specifically the urinary bladder and the kidney.

**Skills– Graduate\* is able to:**

G.S1	E.U1. Conduct medical interview with an adult patient E.U3. Conduct a complete and targeted physical examination of an adult patient E.U14 Recognize life-threatening conditions E.U16. Plan diagnostic, therapeutic and prophylactic procedures E.U24. Interpret laboratory test results and identify any abnormalities and their underlying causes
G.S2	

**5. ADDITIONAL EFFECTS OF LEARNING** (*non-compulsory*)

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

K1	D.W5 Basic principles of communication with the patient and their relatives; development of empathetic and trust-based relationship D.W6. The importance of verbal and non-verbal communication with the patient and the concept of trust-based interaction with the patient
K2	

**Skills– Graduate is able to:**

S1	Can interpret laboratory test results and identifies the causes of abnormal results
----	---

S2	Can plan specialist consultations.
----	------------------------------------

**Social Competencies – Graduate is ready for:**

SC1	
SC2	

**6. CLASSES**

Form of class	Class contents	Effects of Learning
Lectures	L1 Acute kidney injury L2 Chronic kidney disease	E.W1, E.W7
Seminars	S1 Additional tests in nephrology S2 Anemia in chronic kidney disease S3 Neoplasms of kidney and urinary tract S4 Polycystic kidney disease S5 Bone and mineral disorders S6 Urinary tract infections S7 Glomerulonephritis S8 Nephrotic syndrome S9 Dialysis, renal transplantation S10 Sodium and potassium disorders	E.W1, E.W7
Clinical classes	C1 Acute kidney injury, chronic kidney disease C2 Glomerular diseases, tubulointerstitial nephritis C3 Renal replacement therapy C4 Electrolyte and acid-base disorders, fluid management C5 Emergency and life-threatening conditions in nephrology	E.U1, E.U3, E.U12, E.U13, E.U14, E.U16, E.U17, E.U18, E.U20, E.U21, E.U24, E.U29, E.U31, E.U37, E.U38

**7. LITERATURE**

**Obligatory**

Nephrology in a nutshell, Schonermark et al.

**Supplementary**

Primer on Kidney Diseases, Greenberg et al

Nephrology Secrets (fourth edition), Lerma EV et al., Elsevier, 2019

**8. VERIFYING THE EFFECT OF LEARNING**

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
--	--	----------------------

e.g. G.K1, G.S1, K1	<i>This field defines the methods used for grading students e.g. pop quiz, test, written report etc.</i>	e.g. threshold number of points
E.U1, E.U3, E.U12, E.U13, E.U14, E.U16, E.U17, E.U18, E.U20, E.U21, E.U24, E.U29, E.U31, E.U37, E.U38	Assessment during clinical classes, participation in clinical rounds.	
E.W1, E.W3	Final oral completion	At least 50% correct answers. Detailed information will be given at the beginning of the course.

**9. ADDITIONAL INFORMATION** (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

The course in Nephrology takes place Monday – Friday at the Department of Nephrology, Dialysis and Internal Medicine  
UCK WUM 1a Banacha St. Warsaw 02-097  
Lectures: on-line

Seminars:

8<sup>00</sup>-8<sup>45</sup> & 11<sup>30</sup>-13<sup>00</sup>

Seminars are held on the ground floor, in block D, in the room no 20 in UCK WUM Hospital on Banacha 1a str.

Clinical classes:

8<sup>45</sup> -11<sup>30</sup>

Students must have their own medical scrubs or lab coat, stethoscope, student's ID, shoes.

Absence (only one) can be made up for in one of the following manners: during duty at our Department, during course with another group of students or as an oral assessment of the seminar topic from the day of absence.

In the event of more absences the student has to take the course with another group of students. In certain circumstances the final decision depends on the Head of our Department.

Course coordinator: Tomasz Głogowski, MD, tel. no. 22 599 2641, e-mail address: tomasz.glogowski@wum.edu.pl

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

3. COURSE OBJECTIVES	
O1	To familiarize students with the most common diseases of the endocrine glands, their course, diagnosis, diagnosis, differentiation and therapeutic management.
O2	Preparation students for final exams in internal medicine.
O3	Checking the skills and knowledge of students in endocrinology

#### 4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING

Code and number of effect of learning in accordance with standards of learning	Effects in time <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
<b>Knowledge – Graduate* knows and understands:</b>	
E.W1	environmental and epidemiological determinants of the most common illnesses;
E.W7 p. 4	reasons, symptoms, diagnostic and treatment procedures of the most frequent internal diseases and their complications in adult patients: 4) endocrine system diseases, including hypothalamus and pituitary gland, thyroid, parathyroid glands, the cortex and medulla of adrenal glands, ovaries, testicles disease, as well as neuroendocrine tumours, polyendocrine syndromes, different types of diabetes and metabolic syndrome: hypoglycaemia, obesity, dyslipidaemia,
<b>Skills– Graduate* is able to:</b>	
E.U1	collect medical history from adult patients;
E.U3	conduct a complete and targeted physical examination in adults;
E.U7	evaluate the general condition, the state of consciousness and awareness of a patient;
E.U12	perform the differential diagnosis of the most common diseases in adults and children;
E.U24	interpret laboratory test results with the identification of reasons for deviation;

\* In the appendices to the Ordinance of the Minister of Science and Higher Education of July 26, 2019, there is a mention of a "graduate" and not a student

#### 5. ADDITIONAL EFFECTS OF LEARNING *(non-compulsory)*

Number of effect of learning	Effects of learning in time
<b>Knowledge – Graduate knows and understands:</b>	
K1	
<b>Skills– Graduate is able to:</b>	
S1	
S2	
<b>Social Competencies – Graduate is ready for:</b>	

SC1	
SC2	

6. CLASSES		
Form of class	Class contents	Effects of Learning
Partial (optional) and final tests	Checking students' knowledge, discussing questions and clarifying doubts about them	E.W1.,E.W7.
Seminars	Discussing the most common endocrine diseases, their pathogenesis, diagnosis and therapy	E.W1.,E.W7., E.U1., E.U3., E.U7., E.U12., E.U24.
Practical classes	Presentation of endocrine patients by assistants	E.W1.,E.W7., E.U1., E.U3., E.U7., E.U12., E.U24.
Remote presentation of cases by lecturers	On-line presentation of cases of endocrine patients	E.W1.,E.W7., E.U1., E.U3., E.U7., E.U12., E.U24.
Presentations of patients by graduates	Presentation and discussion of endocrine patients by graduates	E.W1.,E.W7., E.U1., E.U3., E.U7., E.U12., E.U24.
Discussion of a clinical case by the student - homework	Detailed reference to the given case and answers to the questions asked on the e-learning platform	E.W1.,E.W7., E.U1., E.U3., E.U7., E.U12., E.U24.

7. LITERATURE
<b>Obligatory:</b>
Basic & Clinical Endocrinology ed FS Greenspan, DG Gardner Harrison's Principles of Internal Medicine
<b>Supplementary</b>

8. VERIFYING THE EFFECT OF LEARNING		
Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
Np. A.W1, A.U1, K1	<p>1. Homework: 3 homework during a weekly block of classes placed on the e-learning platform <a href="https://e-learning.wum.edu.pl/">https://e-learning.wum.edu.pl/</a>, assessed on a 0-100% scale. the work must be presented in electronic form on the e-learning platform within a strictly defined period of time.</p> <p>2. Team presentation (max. 5 students) of a clinical case presentation in the form of a clinical presentation or by electronic means - assessed on a scale from 0 - 100% at one time. The presentation should include: clinical examination, initial diagnosis, differential diagnosis, analysis. The contribution of the work to preparation of the presentation will be determined by students from a given subgroup.</p>	<p>pass threshold - above 50% grade for achievement (3) - 51-64%</p> <p>(3.5) - 65-70%</p> <p>good grade (4) - 71-85%</p> <p>(4.5) - 85-89%</p> <p>very good rating (5) - 90-100%</p>

	<p>3. Final written test - Multiple-choice test - 20 questions assessed on a 0-100% scale</p> <p>The student receives 1 point for each correct answer. The maximum possible number of points from the final test depends on the type of questions and the number of correct answers to each of them in a given test, therefore it may be variable and differ for subsequent groups of students. The minimum number of correct answers to pass the final test is 50%. Passing the final test is a required condition for successfully passing the entire block.</p> <p>The final grade at the end of the class is derived from:</p> <ul style="list-style-type: none"> <li>• 60% - the result of the final test</li> <li>• 20% - average homework score</li> <li>• 20% - the result of the case presentation</li> </ul> <p>In the event of an unsatisfactory grade, the student is entitled to a second date, i.e. another credit card, before his / her assistant with whom he / she was taking classes.</p> <p>One can get credit for:</p> <ol style="list-style-type: none"> <li>1. By writing a written test with the next exercise group</li> <li>2. In exceptional circumstances (no other group, no appropriate date, etc.) - presentation of an additional clinical case</li> </ol>	

**9. ADDITIONAL INFORMATION** (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

The weekly series of classes consists of 20 seminars and 10 lesson hours of practical classes or case presentations in a remote-electronic form

The content of the seminars is available on the website: <https://e-learning.wum.edu.pl/>

- S1. Hypopituitarism
- S2. Active and non-active pituitary adenomas
- S3. Primary hyperthyroidism and hypothyroidism
- S4. Nodular disease of the thyroid gland
- S5. Adrenal insufficiency
- S6. Cushing's syndrome
- S7. Neuroendocrine tumors and multi-glandular neoplastic syndromes
- S8. Disorders of parathyroid function and calcium-phosphate metabolism
- S9. Obesity and lipid disorders
- S10. Emergences in endocrinology

Two lectures will be presented :

Lectures:

1. Nov. 28<sup>th</sup> 2023; 14<sup>50</sup>-16<sup>20</sup>; Paw. 01, ul. Pawińskiego 7
2. Dec. 05<sup>th</sup> 2023; 14<sup>50</sup>-16<sup>20</sup>; Paw. 01, ul. Pawińskiego 7

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## 2. BASIC INFORMATION

<b>Year and semester of studies</b>	5 year, 10 semester	<b>Number of ECTS credits</b>	2.00
<b>FORMS OF CLASSES</b>		<b>Number of hours</b>	<b>ECTS credits calculation</b>
<b>Contacting hours with academic teacher</b>			
Lecture (L)			
Seminar (S)		10	0.25
Classes (C)		20	1.0
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
<b>Unassisted student's work</b>			
Preparation for classes and completions		20	0.75

## 3. COURSE OBJECTIVES

O1	To get acquainted with medical issues in the diagnosis and therapeutic methods in Neurosurgical Department.
O2	Acquiring additional knowledge and competence to solve neurosurgical problems.
O3	Obtaining additional competence in diagnosis and therapy.

## 4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)

<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> (in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)
---	---

**Knowledge – Graduate\* knows and understands:**

F.W13 p. 1-6	causes, symptoms, principles of diagnosis and therapeutic treatment in the case of the most common diseases of the central nervous system in terms of: 1) cerebral oedema and its consequences with a particular reference to emergencies, 2) other forms of intracranial narrowness with their consequences, 3) cranial-cerebral injuries, 4) vascular defects of the central nervous system, 5) tumours of the central nervous system, 6) diseases of the spine and spinal cord;
F.W15	principles of suspecting and recognising the brain death

**Skills– Graduate\* is able to:**

F.U22	assess an unconscious patient according to the international point scales
F.U3	observe the rules of asepsis and antisepsis
F.U12	monitor perioperative care with the aid of basic vital signs
F.U21	assess an unconscious patient according to the international point scales

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

**5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)**

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

K1	
K2	

**Skills– Graduate is able to:**

S1	
S2	

**Social Competencies – Graduate is ready for:**

SC1	
SC2

## 3. COURSE OBJECTIVES

O1	The aim of the course is to achieve and preserve knowledge about the principles of the assesment, differential diagnosis and treatment of the disease within the following areas of Pediatrics: Pediatric Nephrology
O2	
O3	

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING** (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher Education from 26th of July 2019</i> )
---	--

**Knowledge – Graduate\* knows and understands:**

G.K1/ E.W1	Knowledge of environmental and epidemiological circumstances of the most often seen diseases within the following areas of Pediatrics: Pediatric Nephrology/ E.W1: environmental and epidemiological determinants of the most common illnesses
G.K2/ E.W3, 6	Basic knowledge of pediatric nephrology: development, structure and function of kidneys, structural abnormalities of urinary tract, urinary tract infection, nephrotic syndrome and glomerulonephritis, nephropathies: SLE, Henoch-Schonlein syndrome and others, urolithiasis, hemolytic- uremic syndrome, acute kidney injury, chronic kidney disease with renal replacement therapy/ E.W3, 6: causes, symptoms, principles of diagnosis and therapeutic treatment of the most common diseases in children: urinary system infections, congenital defects of the urinary system, nephrotic syndrome, nephrolithiasis, acute and chronic renal failure, acute and chronic renal inflammations, systemic renal diseases, urination disorders, vesicoureteral reflux

**Skills– Graduate\* is able to:**

G.S1	Ability to make a diagnosis, based on child's medical history, findings in physical examination along with additional tests and images
G.S2	Ability to differentiate abnormal findings in anamnesis and physical examination within following areas of Pediatric Nephrology
E.U2	collect medical history from a child and its family
E.U4	conduct a physical examination of children of any age
E.U7	evaluate the general condition, the state of consciousness and awareness of a patient
E.U9	compare percentile charts with anthropometric and blood pressure measurements
E.U10	evaluate the grade of sexual development
E.U12	perform the differential diagnosis of the most common diseases in adults and children
E.U13	assess and describe the patient's somatic and psychological states
E.U14	recognise immediate threats to life
E.U15	recognise states under the influence of alcohol, drugs and other stimulants
E.U16	plan diagnostic, therapeutic and preventive treatment
E.U17	analyse the side effects of particular medicines and interactions between them
E.U18	propose the individualisation of applicable therapeutic guidelines and alternative treatment in the case of ineffectiveness or contraindications to standard therapy
E.U20	qualify patients for home and hospital treatment

E.U21	recognise the conditions in which life expectancy, functional patient state or preferences limit the treatment according to the guidelines for a given disease
E.U24	interpret laboratory test results with the identification of reasons for deviation
E.U25	use feeding protocols (enteral and parenteral)
E.U27	qualify a patient for vaccinations
E.U32	plan specialist consultations

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

<b>5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)</b>	
<b>Number of effect of learning</b>	<b>Effects of learning in time</b>
<b>Knowledge – Graduate knows and understands:</b>	
K1	Importance of profound analysis of pediatric patient problems
K2	Use of objective sources of medical knowledge/ sciences
<b>Skills– Graduate is able to:</b>	
S1	Have a good contact with patients and parents
S2	Understand different background of patients and their parents
<b>Social Competencies – Graduate is ready for:</b>	
SC1	Cooperate in a group of professionals in a proces of diagnosis and treatment
SC2	Be responsible for decisions in a therapeutic process

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>
Lectures	Congenital anomalies of the kidney and the urinary tract Kidney involvement in systemic disease Urolithiasis	E.W1, E.W3 p. 6
Seminars	Acute kidney injury Chronic kidney disease Nephrotic syndrome Glomeruloneephritis CAKUT Hypertension Urinary bladder disurbances Hematuria Hemolytic uremic syndrome Laboratory investigation and diagnostic imaging in Nephrology	E.W1, E.W3 p. 6, G.S1, G.S2, E.U2, E.U4, E.U7, E.U9, E.U10, E.U12, E.U13, E.U14, E.U15, E.U16, E.U17, E.U18, E.U20, E.U21, E.U24, E.U25, E.U27, E.U32  During the seminars teachers will check understanding of the topic problems

Classes	Practical bedside classes with appointed teacher	G.S1, G.S2, E.U2, E.U4, E.U7, E.U9, E.U10, E.U12, E.U13, E.U14, E.U15, E.U16, E.U17, E.U18, E.U20, E.U21, E.U24, E.U25, E.U27, E.U32 Evaluate the practical knowledge of physical examination and analysis of symptoms
---------	--	---

## 7. LITERATURE

### Obligatory

Nelson Essentials of Pediatrics, 8th ed, Marcdante K, Kliegman RM, Elsevier Health Sciences, 2018

### Supplementary

Nelson Textbook of Pediatrics, 20th ed, Kliegman RM W.B. Saunders Company 2015

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
e.g. G.K1, G.S1, K1	Active participation in lectures and seminars Oral colloquium or test	At least satisfactory acquisition of outcomes corresponding to the subject
	Bedside classes	At least satisfactory acquisition of abilities in bedside classes according to the direct teacher's assessment

## 9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

White coat and footwear change is required during bedside classes

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

### ATTENTION

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

O1	The aim of the course is to achieve knowledge about the principles of the assessment, differential diagnosis and treatment of hematological and oncological disorders of childhood.
O2	

O3	
----	--

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING (concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)**

Code and number of effect of learning in accordance with standards of learning	Effects in time <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
--	---

Knowledge – Graduate\* knows and understands:

E.W1	environmental and epidemiological determinants of the most common illnesses within the following areas of pediatric hematology and oncology
E.W3, 4	causes, symptoms, principles of diagnosis and therapeutic treatment of the most common diseases in children: 4. anaemia, bleeding diatheses, marrow failure, cancers in children, including solid tumours typical of childhood
E.W4	the following terms: battered child, sexual harassment, mental retardation, conduct disorders: psychoses, addictions, eating and excretion disorders in children

Skills– Graduate\* is able to:

E.U2	collect medical history from a child and its family
E.U4	conduct a physical examination of children of any age
E.U6	conduct an explanatory examination of hearing and the field of vision, as well as an otoscopic examination
E.U7	evaluate the general condition, the state of consciousness and awareness of a patient
E.U9	compare percentile charts with anthropometric and blood pressure measurements
E.U10	evaluate the grade of sexual development
E.U12	perform the differential diagnosis of the most common diseases in adults and children
E.U20	qualify patients for home and hospital treatment
E.U24	interpret laboratory test results with the identification of reasons for deviation
E.U27	qualify a patient for vaccinations

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

**5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)**

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

Knowledge – Graduate knows and understands:

K1	Basic knowledge of pediatric hematology and oncology: anemia in children, hemophilia, lymphadenopathy, hemorrhagic diathesis, thrombosis in children, neutropenia in children, leukemia, solid tumors in children, transfusion of blood products
K2	
Skills– Graduate is able to:	
S1	Ability to make a diagnosis based on child’s medical history, findings in physical examination along with additional tests and imaging.
S2	Ability to differentiate abnormal findings in anamnesis and physical examination within following areas of pediatric hematology and oncology
Social Competencies – Graduate is ready for:	
SC1	
SC2	

6. CLASSES		
Form of class	Class contents	Effects of Learning
Lectures	Acquired aplastic anemia Hematopoietic stem cell transplantation in children Hemophagocytic syndrome in children	E.W.1 E.W.3 E.W.4
Seminars	Anemia in children Lymphadenopathy Hemophilia Other hemorrhagic diathesis in children Lymphoma in children Leukemia in children Thrombosis in children Neutropenia in children Solid tumors in children	E.W.1 E.W.3 E.W.4
Bedside classes	Training of practical, signs and symptoms assessment as well as diagnosis in pediatric hematology and oncology	E.U.2, E.U.4, E.U.6, E.U.7, E.U.9, E.U.10, E.U.12 E.U.20 E.U.24 E.U.27

7. LITERATURE	
Obligatory	
1.	Nelson Essentials of Pediatrics, 7 <sup>th</sup> ed, Marc Dante K, Kliegman RM; W.B. Saunders Company, 2015

2.	Illustrated Text book of Pediatrics, 4 <sup>th</sup> ed, Lissauer T, Clayden G; Mosby Ltd., 2012
Supplementary	
1.	Nelson Textbook of Pediatrics, 20th ed, Kliegman, Stanton, St.Geme, Schor; W.B. Saunders Company, 2015

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
e.g. G.K1, G.S1, K1	Active participation in seminars, lecture, rounds in oncology division. Oral colloquium	At least satisfactory acquisition of outcomes corresponding to the subject
	Bedside classes	At least satisfactory acquisition of abilities in bedside classes according to the direct teacher's assessment.

## 9. ADDITIONAL INFORMATION (information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)

E-learning depending on the epidemiological situation.

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

### ATTENTION

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

<b>2. BASIC INFORMATION</b>			
<b>Year and semester of studies</b>	V year, summer semester	<b>Number of ECTS credits</b>	9.00
<b>FORMS OF CLASSES</b>		<b>Number of hours</b>	<b>ECTS credits calculation</b>
<b>Contacting hours with academic teacher</b>			
Lecture (L)			
Seminar (S)		20	1.00
Classes (C)		120	5.00
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
<b>Unassisted student's work</b>			
Preparation for classes and completions		75	3.00

<b>3. COURSE OBJECTIVES</b>	
O1	To obtain the theoretical knowledge on physiology and pathology of the pregnancy and the delivery as well as physiopathology of the neonatal period.
O2	To obtain practical ability of obstetrical examination of women during pregnancy, labor and puerperium.
O3	To obtain practical ability in management of normal and complicated delivery.
O4	To gain basic training in management of obstetrical emergencies.
O5	To gain basic knowledge about endocrinology.
O6	To gain practical basic skills in the field of obstetrics.

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b> <i>(concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)</i>	
<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>

<b>Knowledge – Graduate* knows and understands:</b>	
G.K1	F.W9.2 reproductive functions of women, any related disorders and diagnostic and therapeutic actions concerning in particular: pregnancy. Graduate is able to diagnose and monitor physiological and pathological pregnancy.
G.K2	F.W9.3 Graduate is able to diagnose and monitor physiological and pathological childbirth,
G.K3	F.W9.3 Student knows the puerperium development and complications during puerperium.
G.K4	F.W9.1 Student is able to diagnose menstrual cycle and its disorders.

**Skills– Graduate\* is able to:**

G.S1	F.U15 Graduate is able to interpret CTG monitoring.
G.S2	F.U16 recognize the beginning of delivery and improper delivery duration;
G.S2	F.U13 recognize the signs and symptoms proving an improper course of pregnancy (abnormal bleedings, contractile activity of the uterus);
G.S2	F.U14 interpret the results of a physical examination of a pregnant woman (blood pressure, heart function of the foetus's mother) and the results of laboratory tests proving pregnancy pathologies;
G.S3	F.U17 Graduate is able to interpret the signs and symptoms during puerperium;
G.S4	F.U18 Graduate knows indications and contraindications to use contraceptives.

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

## 5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

K1	Student respects medical confidentiality and patient's rights.
----	--

**Skills– Graduate is able to:**

S1	Student is guided by the good of the patients, putting them in the foreground.
----	--

**Social Competencies – Graduate is ready for:**

SC1	Able to establish and maintain a deep and respectful contact with the patient.
SC2	Able to establish and maintain a deep and respectful contact with the therapeutic team.

## 6. CLASSES

Form of class	Class contents	Effects of Learning
---------------	----------------	---------------------

Seminar (S)	<p>S1. Diagnosis of the pregnancy. Physiological changes during pregnancy development. Methods of electronic (CTG,USG) and biochemical monitoring in pregnancy and labour.</p> <p>S2. Pregnancy in diabetic woman. Liver diseases in pregnancy.</p> <p>S3. Uterine function disorders: atony- diagnosis &amp; treatment. Rupture of the uterus. Post-term pregnancy and induction of labour.</p> <p>S4. Haemostasis and coagulation disorders in pregnancy. Shock in obstetrics. Premature ablation of the placenta. Intrauterine fetal death. Amniotic fluid embolus.</p> <p>S5. Physiopathology of the newborn.</p> <p>S6. Abortion- classification, diagnosis and treatment. Incompetent cervix- diagnosis and treatment. Premature labour- treatment. The puerperium- normal changes and complications.</p> <p>S7. Rh incompatibility. Life threatening and emergency cases in obstetrics.</p> <p>S8. Heart diseases in pregnancy. Anaemia in pregnancy. Infectious diseases in pregnancy. Physiotherapy in obstetrics.</p> <p>S9. PIH and Eclampsia. Urinary tract infections in pregnancy.</p> <p>S10. Management of normal vaginal delivery. Breech presentation. Abnormal position and lie of fetus. Use of forceps and vacuum.</p>	<p>G.K1, G.S1</p> <p>G.K1, G.S2 G.K1, G.K2, G.S2</p> <p>G.K1, G.K2, G.S2</p> <p>G.K1, G.K2, G.S2, G.S3</p> <p>G.K1, G.S2</p> <p>G.K1, G.K2, G.S2 G.K1, G.S2 G.K4, G.S4</p>
Classes (C)	Clinical practice in wards, practical classes with phantom demonstrations	G.S1-G.S4
e-learning (e-L)	Optional synchronous learning and asynchronous learning in online education via e-learning.wum.edu.pl, Microsoft Teams, Zoom (seminars only)	

## 7. LITERATURE

### Obligatory

1. Llewelyn- Jones D.: "Fundamentals of Obstetrics and Gynaecology" Elsevier Limited, 2017.

### Supplementary

1. Contemporary student's textbook of obstetrics and gynaecology edited in United States or the United Kingdom may be accepted.
2. Crash Course 4<sup>th</sup> Edition, Obstetrics and Gynaecology. Elsevier Limited, 2019.
3. Brian A. Magowan. Clinical Obstetrics and Gynaecology. 4<sup>th</sup> Edition. Elsevier Limited 2019.
4. Kate V. Meriwether. Obstetrics and Gynaecology Morning Report. Elsevier 2018.
5. Hao-Hua Wu. Gunner Googles. Augmented 1<sup>st</sup> Edition. Obstetrics and Gynaecology. Elsevier 2019.
6. John Guillebaud. 7<sup>th</sup> Edition Contraception. Elsevier 2017.

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
e.g. G.K1, G.S1, K1	<i>This field defines the methods used for grading students e.g. pop quiz, test, written report etc.</i>	<i>e.g. threshold number of points</i>
G.K1- G. K4; G.S1- G.S4; K1, S1; SC1	Complete the entire course and attendance at all classes with the exception of one permitted absence during the course. Student's presence confirmed in the student's card (S+PC) + positive result of the test	Normal Distribution (Gaussian Distribution)

**9. ADDITIONAL INFORMATION** (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

1. The student is obliged to read the syllabus and time- table on the notice board in the department.
2. The student participate in classes (seminars and practice) only with the group. Possible group chance is allowed in exceptional, justified situations and requires individual approval (anna.wnuk@wum.edu.pl; joanna.kacperczyk-bartnik@wum.edu.pl)
3. The student is obliged to follow the Medical University of Warsaw Regulations (available on the University's website).
4. During classes with patients, students keep seriousness and silence.
5. Meals and drinks should be consumed during breaks.
6. Students are obliged to obey the rules regarding participation in the Operating Theatre activities (provided by course coordinator)
7. Students interested in additional learning opportunities in obstetrics and gynecology are welcome to the Students' Scientific Group affiliated to II Department of Obstetrics and Gynecology (contact: joanna.kacperczyk-bartnik@wum.edu.pl)

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## Surgery

2. BASIC INFORMATION				
Year and semester of studies	5 <sup>th</sup> year, winter/spring semester		Number of ECTS credits	7.00
FORMS OF CLASSES			Number of hours	ECTS credits calculation
Contacting hours with academic teacher				
Lecture (L)			0	0

Seminar (S)	35	2,3
Classes (C)	65	4,7
e-learning (e-L)	0	0
Practical classes (PC)	0	0
Work placement (WP)	0	0
<b>Unassisted student's work</b>		
Preparation for classes and completions		

<b>3. COURSE OBJECTIVES</b>	
O1	Student takes medical history. Student assesses general condition of the patient, their consciousness and awareness. Student describes patient's somatic complaints. Student performs full medical examination. Student makes differential diagnosis.
O2	Student knows and understands signs and symptoms, diagnosis and management of the most common diseases that require surgical treatment
O3	Student knows indications, complications of the most common types of surgeries
O4	Student assists in typical surgery. Student is able to use basic surgical tools. Student obeys to rules of asepsis and antysepsis. Student knows safety rules of preoperative and postoperative patient's management.
O5	Student participates in basic medical procedures.

<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b> ( <i>concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study</i> )	
Code and number of effect of learning in accordance with standards of learning	Effects in time ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019</i> )
<b>Knowledge – Graduate* knows and understands:</b>	
F.W1	Graduate knows and understands signs and symptoms, diagnosis and management of the most common diseases that require surgical treatment: a) Acute and chronic abdominal diseases b) Thoracic diseases c) Head trauma d) bone fractures and organ injuries;
F.W3	Graduate knows rules of qualification and performance, as well as the most common complications of basic surgical procedures and invasive diagnostic and therapeutic procedures;
F.W4	Graduate knows principles of perioperative safety, patient preparation for surgery, general and local anaesthesia and controlled sedation;
F.W5	Graduate knows post-operative treatment with analgesic therapy and postoperative monitoring;
F.W10	Graduate knows the problems of contemporary imaging studies, in particular: 1) radiological symptomatology of basic diseases, 2) instrumental methods and imaging techniques used to perform therapeutic procedures, 3) indications, contraindications and preparation of patients for particular types of imaging examinations and contraindications to the use of contrast agents;

F.W14	Graduate knows basic issues related to transplantology, indications for the transplantation of permanently impaired organs and tissues, as well as the related procedures;
E.W1	Graduate knows environmental and epidemiological determinants of the most common illnesses;
D.W4	Graduate knows social approaches to the meaning of health, illness, disability and aging, social consequences of illnesses, disability and socio-cultural barriers, as well as the applicable concept of life quality conditioned by health condition;
<b>Skills– Graduate* is able to:</b>	
E.U1	Graduate is able to take medical history. Graduate student is able to assesses general condition of the patient, their consciousness and awareness. Student describes patient's somatic complaints.
E.U3	Graduate is able to conduct a complete and targeted physical examination in adults;
E.U7	evaluate the general condition, the state of consciousness and awareness of a patient;
E.U16	Graduate makes differential diagnosis. plan diagnostic, therapeutic and preventive treatment;
F.U1	Graduate assist in a typical surgery, prepare the surgical field and use local anaesthetics at the operated area;
F.U2	Graduate is able to use basic surgical tools.
F.U3	Graduate is able to observe the rules of asepsis and antisepsis;
F.U4	Graduate is able to dress a simple wound, apply and change a sterile surgical dressing;
F.U5	Graduate is able to place a venous access;
F.U6	Graduate is able to examine nipples, lymph glands, thyroid gland and abdomen in the context of acute abdomen, as well as conduct the per rectum palpation;
F.U12	Graduate is able to monitor perioperative care with the aid of basic vital signs;
F.U21	Graduate is able to assess an unconscious patient according to the international point scales;
F.U22	Graduate is able to diagnose the symptoms of intracranial hypertension;
E.U29 p. 2, 5, 7	Graduate is able to perform the basic medical procedures, including:  2. vital signs monitoring with the aid of a pulse oximeter and cardiac monitor  5. intravenous, intramuscular, subcutaneous injections, intravenous cannulation, venous blood sampling, blood culture taking, arterial and capillary blood sampling,  7. male and female urinary bladder catheterisation, nasogastric tube placement, stomach lavage, enema,
D.U15	Graduate cares about patient's rights i.e. protects his privacy, respects his right for intimacy, right for information about his health.
D.U4	Graduate develop a trust-based relationship during the whole diagnostic and treatment process;
D.U5	conduct an interview with an adult patient, a child and the family with empathy and listening actively; is able to discuss the patient's life situation;
D.U12	communicate with the team, sharing constructive feedback and support;

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

## 5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)

Number of effect of learning	Effects of learning in time
<b>Knowledge – Graduate knows and understands:</b>	
K1	
<b>Skills– Graduate is able to:</b>	
S1	
<b>Social Competencies – Graduate is ready for:</b>	
SC1	

<b>6. CLASSES</b>		
Form of class	Class contents	Effects of Learning
Classes (C)	C1- Physical examination and medical history taking. C2- Medical case presentation. C3- Participation in the medical procedures undertaken on the ward, postoperative room. C4- Participation in surgeries. C5- Outpatient Department. C6- Basic suturing techniques. C7- Ultrasound imaging as a diagnostic and therapeutic tool.	E.U1, E.U3, E.U7, E.U16, E.U29, F.U1, F.U2, F.U3, F.U4, F.U5, F.U6, F.U12, F.U21, F.U22, D.W15, D.W4, D.W5, D.W12.
Seminar (S)	S1- Preoperative and postoperative problems in surgical patient care. S2- Surgical wounds care and surgical technique. S3- Abdominal hernias S4- Head trauma S5- Gastrointestinal bleeding. S6- Acute pancreatitis. S7- Gallstones and chronic cholecystitis. S8- Colon cancer. S9- DVT S10- Spleen surgery S11- Ileus S12- Peptic ulcer disease S13- Appendicitis S14- Introduction to trauma S15- Atherosclerosis obliterans. Aneurysms.	F.W1, F.W3, F.W4, F.W5, F.W10, F.W14, E.W1, D.W4.

<b>7. LITERATURE</b>
<b>Obligatory</b>
Principles and Practice of Surgery. O. James Garden et al. Elsevier, 7th Edition
<b>Supplementary</b>

<b>8. VERIFYING THE EFFECT OF LEARNING</b>		
Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion

PC1-PC7	Students are assessed on the grounds of their regular attendance at seminars and active participation in bedside classes	Attendance
S1-S15	MCQ test	At least satisfactory result of the MCQ test provided on the last day of the course (12/20).

**9. ADDITIONAL INFORMATION** (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

**Didactics and organization of the classes in Department and Clinic of General, Vascular, Endocrinological and Transplant Surgery (1W14) Banacha St:**

- classes start at 9 a.m and continue until 2 p.m. (including half- an- hour- break)
- students - students are expected to have their own lab coat, stethoscope, student's ID, shoes
- to complete the course students are expected to pass a test composing of 20 questions (a minimum of 12 correct answers is needed to pass the test). MCQ test covers program based on seminars and practical classes
- student's absences should be worked out on duties in terms coordinated by tutor; only 2 absences are allowed to be worked out. There is no credit for the student who was missing more practical classes or seminars

**Didactics and organization of the classes in 2nd Department of General, Vascular and Oncological Surgery (2W2/ WLS19) Stępińska St:**

- realization of the program will be based on seminars presenting the current state of knowledge in specific subject and practical classes in clinical wards, out-patients clinics, operation theater
- classes start at 9 a.m and continue until 2 p.m. (including half- an- hour- break)
- students are expected to have their own lab coat, stethoscope, student's ID, shoes
- to complete the course students are expected to pass a test composing of 20 questions (a minimum of 12 correct answers is needed to pass the test). MCQ test covers program based on seminars and practical classes
- student's absences should be worked out on duties in terms coordinated by tutor; only 2 absences are allowed to be worked out. There is no credit for the student who was missing more practical classes or seminars

**Surgery Club**

Surgery Club is directed to English Division students. Tutors of the club are M. Polańska- Płachta MD PhD, Łukasz Kaczorowski MD. Meetings are held twice a month. Members of the club are allowed to participate in medical duties and have the possibility to write medical papers, case reports which are then presented on student's conferences.

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## Rehabilitation

<b>3. COURSE OBJECTIVES</b>	
O1	Introduction to the basics of medical rehabilitation
O2	Recognise various physical disabilities and functional limitations experienced by people who receive rehabilitation services
O3	Identify generic and specialized resources available to serve people with disabilities
O4	Identify the roles of different professionals in the field of rehabilitation
O5	Develop basic rehabilitation service delivery skills - Describe rehabilitation process and techniques used to evaluate eligibility for services - Develop appropriate treatment plans, and provide follow-up
<b>4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING</b> ( <i>concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study</i> )	

<b>Code and number of effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
---	--

**Knowledge – Graduate\* knows and understands:**

E.W30.	The concept of disability and invalidity
E.W31.	The role of medical rehabilitation and methods used within the course of medical rehabilitation process

**Skills– Graduate\* is able to:**

E.U22.	Perform a functional assessment of a patient with disability
E.U23.	Propose rehabilitation program in the most common diseases

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

**5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)**

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

O.W3.	Diagnostic and therapeutic methods appropriate for specific disease states
-------	--

**Skills – Graduate is able to:**

O.U8.	Communicate with colleagues in the team and share knowledge
-------	---

**Social Competencies – Graduate is ready for:**

O.K5	Noticing and recognizing own limitations and self-assessment of deficits and educational needs
O.K7	The use of objective sources of information
O.K9	Implementing the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multi-national environment

**6. CLASSES**

## 7. LITERATURE

### Obligatory

Mitra R. Principles of Rehabilitation Medicine [Internet]. New York: McGraw-Hill Education; 2019. Available in: <https://accessmedicine-1mhmedical-1com-1000015tb0cd3.han3.wum.edu.pl/Book.aspx?bookid=2550>

Maitin I. B., Cruz E. Current diagnosis & treatment. Physical medicine & rehabilitation [Internet]. New York: McGraw-Hill Education; 2015.

Available in:

<https://accessmedicine-1mhmedical-1com-1000015tb0cd3.han3.wum.edu.pl/Book.aspx?bookid=1180>

### Supplementary

Students who are particularly interested in the issues discussed, will have access to the additional materials. Articles and books will be available on the e-learning platform: <https://e-learning.wum.edu.pl/en/>.

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
E.W30.; E.W31., E.U22., E.U23., O.W3., O.U8., O.K5, O.K7, O.K9;	<b>On-line test with Multiple Choice Questions (MCQs)</b>	<b>Correct answers to at least 60% of MCQs</b>
E.U22., E.U23., O.U8., O.K5, O.K9;	<b>Direct teacher's assessment</b>	<b>At least 60% correctness of the practical task completion</b>

## 9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

Duration of the course is 1 week (from Monday to Friday).

Attendance is obligatory. The attendance list is checked every day. More than 1 absence will result in failure of the course. Only documented reason for absence is taken into account.

We meet at the Department of Rehabilitation (Banacha 1a Str., building E, -1 floor, next to the registration) at 9:00 a.m.

Lab coats / scrubs, facial masks, and footwear change are required during stationary classes.

The detailed course schedule will be presented on the first day.

Seminars will be undertaken in the form of e-learning modules using e-learning WUM platform: <https://e-learning.wum.edu.pl/en/>.

Materials for self-study will be available on the e-learning platform.

The final test takes place on the last day of the course.

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

### ATTENTION

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

<b>2. BASIC INFORMATION</b>			
Year and semester of studies	V year, IX and X semester	Number of ECTS credits	2.00
FORMS OF CLASSES	Number of hours	ECTS credits calculation	
Contacting hours with academic teacher			
Lecture (L)	6	0.2	
Seminar (S)	19	1.0	
Discussions (D)	15	0.8	
e-learning (e-L)			
Practical classes (PC)			
Work placement (WP)			
Unassisted student's work			
Preparation for classes and completions			

<b>3. COURSE OBJECTIVES</b>	
O1	Legal issues in transplantology. Indications for solid organ transplantation
O2	Basics of transplantation immunology, tissue typing and recipient selection, rules of immunosuppressive treatment.
O3	Common post-transplant complications- pathogenesis, clinical presentation, differential and treatment

#### 4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING

<b>Code and number of the effect of learning in accordance with standards of learning</b>	<b>Effects in time</b> <i>(in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)</i>
---	--

##### Knowledge – Graduate\* knows and understands:

G.K1	C.W25. Issues in the field of transplantation immunology, principles of selecting the donor and recipient of organ and stem cells transplants (genetic bases for donor and recipient matching, as well as the basics of transplant immunology) F.W14. The basics of interventional transplantation, indications for the transplantation of irreversibly damaged organs and tissues and related procedures. F.W15. Principles of brain death determination
G.K2	C.W39. Major drug side effects, including drug interactions
G.K3	D.W6 The importance of verbal and non-verbal communication in the process of communicating with the patient and the concept of trust in the interaction with the patient

##### Skills– Graduate\* is able to:

G.S1	E.U1. Conduct medical interview with and adult patient E.U3. Conduct a complete and targeted physical examination of an adult patient E.U14 Recognize life-threatening health conditions E.U16. Plan diagnostic, therapeutic and prophylactic procedures E.U32. Plan specialist consultations E.U20. Qualify the patient for home and hospital treatment
G.S2	E.U17. Analyze the possible side effects of individual drugs and their interactions E.U38. Keep the patient's medical records
G.S3	E.U29 p. 1 Perform basic medical procedures including: body temperature measurement (superficial and deep), pulse measurement, non-invasive pressure measurement

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

#### 5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)

<b>Number of effect of learning</b>	<b>Effects of learning time</b>
-------------------------------------	---------------------------------

##### Knowledge – Graduate knows and understands:

K1	Types of transplants and immune mechanisms of allograft rejection
K2	

##### Skills– Graduate is able to:

S1	
----	--

S2	
<b>Social Competencies – Graduate is ready for:</b>	
SC1	Acts for the patient's sake as his priority
SC2	Able to establish and maintain a deep and respectful contact with the patient.

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>
Lectures	L1. Organization of organ procurement and sharing in Poland. L2 Surgical complications in transplant recipients L3. Transplantation of heart, transplantation of lungs. L4. Regenerative medicine. L5. Transplant tolerance. L6. Current problems of transplantology.	F.W15, G.W9. F.W14 F.W14 E.W21, E.W22 F.W15, G.W9.m E.W21 E.W22
Seminars	S1. Organ procurement, evaluation and selection of donors. Organ preservation. S2. Qualification to kidney transplantation. S3. Qualification to liver transplantation. S4-5. Liver transplantation- surgical techniques and surgical complications. S6-7 Cardiological, metabolic and hematological complications after solid organ transplantation. S8. Malignancies in solid organ recipients. S9-10. Principles of immunosuppressive therapy in organ transplantation. S11-12. Transplant rejection and ther pathologies evolving in solid organ transplants. S13. Transplantation from living donor. S14-15 Infectious complications after solid organ transplantation. S16. Transplantation of pancreas and pancreatic islets. S17. Post-transplant management of liver transplant recipients. S18-19. Post-transplant management of kidney transplant recipients.	F.W15, G.W9. E.W7. E.W7. F.W14 E.W7 E.W7 C.W39 E.W21., E.W22
Clinical classes	C1-12 – clinical rounds, individual cases analysis in the department C13 – passive participation in transplanted organ biopsy C14-15 – passive/active participation in out-patients consultations	F.W14, G.W9 E.W7. E.W22 E.W7, E.W22 E.W7, E.W22  E.U1, E.U3, E.U7, E.U14, E.U16, E.U17, E.U32, E.U20, E.U38, D.U15

<b>7. LITERATURE</b>
<b>Obligatory</b>
Handbook of kidney Transplantation By Gabriel M. Danovitch, Lippincott Williams& Wilkins 2017
<b>Supplementary</b>
Tectbook of Organ Transplantation Set, Wiley-Blackwell 2014 Allan D Kirk, Stuart J. Knechtle, Christian P. Larsen et al.

## 8. VERIFYING THE EFFECT OF LEARNING

Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
E.U1, E.U3, E.U7 E.U12, E.U14 E.U16, E.U17 E.U20  B.W21, B.W24, EW1, E.W7, D.U15, C.U17, E.U17	Continuous assessment during the course of the classes, presence and active participation in the clinical rounds. Based on sick leave one day absenteeism is allowed, the remaining ones must be worked off with another group.  Fifteen questions MCQ test	9 points – 2.0 (failed) 10 points – 3.0 (satisfactory) 11 points – 3.5 (rather good) 12 points – 4.0 (good) 13 points – 4.5 (more than good) 14-15 points – 5.0 (very good)

## 9. ADDITIONAL INFORMATION

*(Please write here Information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

1. Duration of the transplantology course: 1 week (from Monday to Friday).
2. Realization of the program will be based on seminars presenting the current state of knowledge in specific subject and practical classes in clinical wards and out-patients clinics
3. Classes start at 8.00.
4. During the course it is possible to be absent only once.
5. Students are expected to have their own lab coat, stethoscope, student's ID, shoes.
6. The student participate in classes (seminars and practice) only with the group. Possible group chance is allowed in exceptional, justified situations and requires individual approval.
7. If a student has two or more absences must make up for absences with another group. Only then can take the test with another group.
8. All student information is provided on an ongoing basis on the Clinic's website [www.klinikamedycynytransplantacyjnej.wum.edu.pl](http://www.klinikamedycynytransplantacyjnej.wum.edu.pl)
9. The student is obliged to follow the Medical University of Warsaw Regulations (available on the University's website).
10. Address: Department of Transplantation Medicine, Nephrology and Internal Diseases, 59 Nowogrodzka St, 02-006 Warsaw, Pavilion 1A.
11. Contact email address: [olga.tronina@wum.edu.pl](mailto:olga.tronina@wum.edu.pl)

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

### ATTENTION

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## 3. COURSE OBJECTIVES

O1	Understanding of definitions, goals, and philosophy of palliative medicine including ethical aspects.
O2	Skills in diagnosing, prevention, and treatment of pain and other most frequent symptoms in the end-stage incurable chronic disease patients.

O3	Communication skills with the patient and his care-givers, and competencies of empathic, holistic care after the patient and his family.
----	--

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING** (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning	Effects in time ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019</i> )
--	---

**Knowledge – Graduate\* knows and understands:**

G.K1– E.W29	knows and understands the principles of diagnosing and therapeutic management of pain (including cancer and other chronic pain) and other most common symptoms in palliative care patients
G.K2 – E.W27 (1, 2, 3), E.W28	knows and understands the causes, symptoms, principles of diagnosing and therapeutic management of the most frequent problems in palliative medicine, including: <ul style="list-style-type: none"> <li>a) symptomatic treatment of the most common symptoms</li> <li>b) management of cachexia; prevention and treatment of bed-sores</li> <li>c) management of the most frequent urgent events in palliative medicine</li> </ul> rules of palliative treatment of a patient in the terminal state

**Skills– Graduate\* is able to:**

G.S1 – E.U20	refer a patient to home or in-patient palliative care
G.S2 – E.U21	define states in which expected the length of life, functional performance or patient's preferences limit the use the management recommended for particular diseases; and is able to use the principles of withdrawing/refraining from futile treatment

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.

**5. ADDITIONAL EFFECTS OF LEARNING** (*non-compulsory*)

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

**Knowledge – Graduate knows and understands:**

K1	
K2	

**Skills– Graduate is able to:**

S1	
S2	

**Social Competencies – Graduate is ready for:**

SC1	acts for the patient's sake as his priority
SC2	observes the patient's intimacy and rights
SC3	is aware of own limitations and the necessity of continuous self-development

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>
Seminar 1-4	Principles and definitions of palliative medicine; qualification for palliative care	E.W29, E.W27, E.W28, E.U20, E.U21 K1, K2, K3
Seminar 3-5	Principles and practical skills of diagnosing and analgesic treatment in cancer and other chronic diseases, based on the recommendations of WHO / ESMO / EAPC; solving clinical cases	E.W29, E.W27 E.U21 K1, K2, K3
Seminar 6-7	Principles of holistic symptomatic management in the end-stage cancer through clinical cases in selected somatic and psychological disorders	E.W29, E.W27, E.W28, E.U20, E.U21 K1, K2, K3
Seminar 8-10	stages of the patient's adaptation to an incurable disease and impending death; practical communication skills of students with the dying person and their family on particular stages of adaptation in the case of an incurable fatal illness	E.W29 K1, K2, K3
Seminar 11-12	palliative care in non-oncological diseases	E.W29, E.W27 E.U21 K1, K2, K3
Seminar 13-14	ethical issues until the end of life (futile / persistent therapy, euthanasia, conditions of a dignified death); doctor's attitude; the ethics of virtues by E. Pellegrino	E.W28 K1, K2, K3
Seminar 15-16	multidimensional aspect of suffering	E.W28 K1, K2
Seminar 17-18	end-of-life care in adult cancer patients	E.W28 K1, K2
e-Learning seminars 19-27	diagnosing and treatment of respiratory symptoms in palliative medicine diagnosing and treatment of gastrointestinal symptoms in palliative medicine; diagnosing and treatment of pressure ulcers in palliative medicine emergencies in palliative medicine	E.W29, E.W27 E.U21 K3

## 3. COURSE OBJECTIVES

C1	Acquiring skills in examining a newborn and getting acquainted with issues in the field of physiology and pathology of the neonatal period.
C2	Principles of neonatal life support and postpartum resuscitation of the newborn

C3	Know the basic complications of prematurity
----	---

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING** (*concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study*)

Code and number of effect of learning in accordance with standards of learning	Effects in time ( <i>in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019</i> )
--	---

Knowledge – Graduate\* knows and understands:

E.W1.	environmental and epidemiological conditions of the most common illness
E.W2.	rules of nutrition of healthy and sick children, protective vaccinations and routine children's health checks
E.W3.	3) acute and chronic diseases of the upper and lower respiratory tract, congenital defects of the respiratory tract, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema,
E.W5.	basic methods of diagnosing and treating the foetus
E.W6.	the most common life threatening conditions in children and the management of these conditions
F.W6.	indications for and principles of use of intensive care
F.W7.	applicable recommendations concerning resuscitation of newborns, children and adults
F.W10 p. 2	the issues of contemporary imaging studies in neonatology
G.W9.	legal regulations concerning transplantations, artificial reproduction, abortion, aesthetic procedures, palliative treatment and mental diseases;

Skills– Graduate\* is able to:

E.U2.	collect medical history from a child and its family;
E.U4.	conduct a physical examination of children of any age
E.U8.	assess the condition of newborns in the APGAR scale and assess their maturity, examine the newborn reflexes
E.U14.	recognize the states of immediate threat to the life of the newborn
E.U12.	perform the differential diagnosis of the most common diseases in adults and children
E.U16.	plan diagnostic, therapeutic and preventive treatment
E.U20.	qualify patients for home and hospital treatment
E.U24	interpret laboratory test results with the identification of reasons for deviation

E.U27.	qualify the patient for vaccinations in the neonatal period
F.U11.	follow the algorithm of advanced life support;

*In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019 „graduate”, not student is mentioned.*

## 5. ADDITIONAL EFFECTS OF LEARNING (*non-compulsory*)

Number of effect of learning	Effects of learning in time
------------------------------	-----------------------------

Social Competencies – Graduate is ready for:

1	establishing and maintaining deep and respectful contact with the patient and the child's mother, as well as showing understanding for worldview and cultural differences
2	be guided by the good of the patient;
3	observance of medical confidentiality and patient rights;
4	aking actions towards the patient based on ethical principles, with the awareness of social conditions and limitations resulting from the disease;
5	noticing and recognizing own limitations and self-assessment of deficits and educational needs
9	implementing the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment
8	formulating conclusions from own measurements or observations;
11	accepting responsibility for decisions made in the course of professional activity, including in terms of one's own safety and that of others.

## 6. CLASSES

Form of class	Class contents	Effects of Learning
Seminars	Adaptation to extrauterin life Principles of examining a newborn. Complications of prematurity. Neonatal Jaundice. Infections of the neonatal period. Perinatal hypoxia. Newborn life suport after birth.	E.W1. E.W2. E.W3. E.W5. E.W6. F.W6. F.W7. F.W10. G.W9.
Practical classes	Practical classes at Neonatal Intensive Care, Special Care Unit, Maternity Unit, Delivery room  Resuscitation classes in Medical Simulation Center.	E.U2. E.U4.

		E.U8. E.U14. E.U12. E.U24. E.U16. E.U20. E.U27. F.U11.
--	--	---

<b>7. LITERATURE</b>
Obligatory
Neonatology, 8th Edition, Tricia Lacy Gomella
Supplementary:
Care of the high-risk neonate- Klaus and Fanaroff's

<b>8. VERIFYING THE EFFECT OF LEARNING</b>		
Code of the course effect of learning	Ways of verifying the effect of learning	Completion criterion
E.W1. E.W2. E.W3. E.W5. E.W6. F.W6. F.W7. F.W10. G.W9.	Sem	<i>Written test</i>
E.U2. E.U4. E.U8. E.U14. E.U12. E.U24. E.U16. E.U20. E.U27. F.U11.	PC	Disease history, epicrisis, observations, recommendations, oral exercise report
Social Competencies:	S, PC	Oral exercise report and observations

**9. ADDITIONAL INFORMATION** (*information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club*)

1. During the classes the following are necessary: medical scrubs, change of shoes, stethoscope
2. The class lasts 4 days, classes begin up at 8:00., including 1 day at the Medical Simulation Center, 8:30 a.m.  
The scope of knowledge applicable at the final test is included in the topics of classes during seminars and exercises, and /ore materials on the e-learning platform. Completion of the course is in writing test. Completing the block requires active participation in all bedside activities and seminars (including preparation for seminars) and passing a test- 20 questions, 14 positive guarantees passing test  
The condition for admission to the colloquium is a positive evaluation of the clinical classes and the completion of possible absences. Unauthorized absence from the test results in failure to pass the course. Obtaining a fail mark in the test requires correction in the same form (written test) with the next groups within the free group lesson.
4. Absences from seminars are counted in the form of an oral answer from the abandoned topic (until the day of the colloquium); absences from bedside classes are made up in the form of additional clinical duty between 09:30 and 12:30 on public holidays. Absence longer than one day makes it necessary to make up the whole block again. Unusual cases are settled individually.
5. Please do not be late for classes. A delay of more than 15 minutes is considered an absence.
6. Students interested in neonatology can participate in the activities of the Students' Science Club in the Clinic.  
<https://web.facebook.com/sknnoworodki>;
7. On the last day of classes, after the test, students complete an anonymous internal questionnaire summarizing the block of neonatology classes.
8. All student information is provided on an ongoing basis on the Clinic's website  
[www.klinikaneonatologii.wum.edu.pl](http://www.klinikaneonatologii.wum.edu.pl)

**Schedule of classes in Medical Simulation Center at 1a Banacha St.:**

- Gr 1:** 28 March at 8.00am - 2.00pm  
**Gr 2:** 25 April at 8.00am - 2.00pm  
**Gr 3:** 7 May at 8.00am - 2.00pm  
**Gr 4:** 15 November at 14.00-20.00  
**Gr 5:** 4 June at 8.00am - 2.00pm

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

**ATTENTION**

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## 3. COURSE OBJECTIVES

O1	To gain the knowledge from public health field.
----	---

**4. STANDARDS OF LEARNING – DETAILED DESCRIPTION OF EFFECTS OF LEARNING**(concerns fields of study regulated by the Regulation of Minister of Science and Higher Education from 26 of July 2019; does not apply to other fields of study)

Code and number of effect of learning in accordance with standards of learning	Effects in time (in accordance with appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019)
--	--

**Knowledge – Graduate\* knows and understands:**

D.W1	social dimension of health and disease, influence of society (family, social relationships network) and social inequalities on health condition, as well social and cultural differences and the roles of social stress in health and self-destructive behaviours
D.W8	how healthcare institutions operate and the social role of physicians
D.W14.	rules of promotion of health, its objectives and main directions of operation, with a special focus on the awareness of healthy lifestyle
D.W17	rights of patients
G.W1	health assessment methods of an individual and a population, disease and medical procedure classification
G.W4	term of public health, its purposes, objectives, as well as the structure and organisation of the healthcare system at the national and global levels, as well as the influence of economic conditions on healthcare availability
G.W5	legal regulations relating to granting healthcare benefits, patient rights, the basics of the profession of a physician and functioning of the medical self-government
G.W6	basic regulations concerning the organisation and financing of the healthcare system, the general health insurance and the rules of organisation of healthcare entity enterprises

**Skills– Graduate\* is able to:**

B.U10	use databases, including the Internet and search for needed information with available tools
D.U3	choose a treatment causing minimum social consequences to a sick person
D.U9	advise on the observance of therapeutic guidelines and healthy lifestyle
D.U15	observe patient's rights
E.U38	keep a patient's medical records
G.U1	describe the demographic structure of a population and assess the population's health problems on this
G.U2	collect information about the presence of the factors of risk of infectious and chronic diseases and plan preventive actions at various levels of prevention
G.U3	interpret the incidence of diseases and disability
G.U4	assess the epidemic situation of diseases common in the Republic of Poland and worldwide
G.U5	explain to healthcare users their basic entitlements and the legal basics of granting bonuses
G.U6	draw up medical certificates for patients, their families and other entities

\* In appendix to the Regulation of Minister of Science and Higher education from 26th of July 2019, „graduate”, not student is mentioned.

<b>5. ADDITIONAL EFFECTS OF LEARNING (non-compulsory)</b>	
<b>Number of effect of learning</b>	<b>Effects of learning in time</b>
<b>Knowledge – Graduate knows and understands:</b>	
W1	ethical, social and legal conditions for practicing medicine and the principles of health promotion, bases knowledge on the scientific evidence
W2	methods of conducting scientific research
<b>Skills– Graduate is able to:</b>	
U1	can plan his/her own educational activity and constantly improve his/her knowledge in order to update the knowledge
<b>Social Competencies – Graduate is ready for:</b>	
K1	establishing and maintaining deep and respectful contact with the patient, as well as showing understanding for differences in worldviews and cultures
K2	compliance with medical confidentiality and patient's rights
K3	promoting pro-health behaviors
K4	using objective sources of information
K5	Implementing the principles of professional team cooperation, including representatives of other medical professions, also in multicultural and multinational environment

<b>6. CLASSES</b>		
<b>Form of class</b>	<b>Class contents</b>	<b>Effects of Learning</b>

## 9. ADDITIONAL INFORMATION *(information essential for the course instructor that are not included in the other part of the course syllabus e.g. if the course is related to scientific research, detailed description of, information about the Science Club)*

1. Available educational materials present the most important information on the theory and practice of public health.
2. The person responsible for teaching in a given year: Magdalena Bogdan, PhD; email: mbogdan@wum.edu.pl Information about the duty hours and the class rules are available in the unit.
3. The Student Scientific Society of Healthcare Management run by the Department of Social Medicine and Public Health of the Medical University of Warsaw is supervised by Magdalena Bogdan, PhD; mbogdan@wm.edu.pl). Information about The Student Scientific Societies is available on the Department's website: <https://msizp.wum.edu.pl/>

Medical University of Warsaw has property rights, including copyright, to the syllabus. The syllabus may be used for educational purposes at the MUW only. Using of the syllabus for other purposes requires consent of the MUW.

### ATTENTION

The final 10 minutes of the last class in the block/semester/year should be allocated to students' Survey of Evaluation of Classes and Academic Teachers.

## VOCATIONAL TRAINING:

**Surgery – 2 weeks – 70h**

**Obstetrics & Gynecology – 2 weeks - 70h**

**5th year, 6-year program ED students**

**Faculty of Medicine**

Upon completion of their fifth year of study students are required to take one-month summer clinical clerkships including a two-week training at the Department of Obstetrics & Gynecology and subsequently a two-week practical course in the Surgical Ward at a teaching hospital in Poland or selected foreign countries. The clerkships are a part of the medical curriculum mandatory to be granted a pass to enter the sixth year of the study.

The head of the Ob/Gyn Department, the surgical ward or an appointed instructor in charge is responsible for providing a detailed program of the practical training course and duty schedules. They also supervise and carry out the final assessment of students' performance.

The duties carried out by the student are those of a regular physician / surgeon, however, under professional supervision of the instructors

During their training students are expected to perform two twenty-four hour shifts (two on each ward) when they shadow the physician / surgeon in charge and assist or do the regulator work.

The main objective of the summer holiday clerkships is to use the theoretical knowledge gained by students in the course of their fourth-year study (e.g. pharmacology, general surgery, internal diseases, pediatric diseases, community medicine etc). As well as to improve their practical skills.

The fifth-year training aims at using the theoretical background students obtained in their courses (gynecology, obstetrics, infectious diseases, internal diseases, paediatric diseases, surgery, neurology, imaging diagnostics, anesthetics etc.) developing and/or improving practical skills.

The program at the G&O ward provides instruction in the following aspects:

1. organization and functioning of the Obstetric Admissions Department, Labor Ward and Maternity Ward;
2. admitting the patient, setting up the patient's records, carrying out activities with respect to the patient's personal toilet;
3. monitoring the stages of labor, completing the chart of the labor course with a particular focus on parameters with respect to the maternal and fetal status;
4. delivering the patient under a close supervision of an obstetrician and midwife;
5. assistance in suturing the perineum;
6. post-delivery assessment of the placenta;
7. instruction in operating diagnostic devices (e.g. amnioscope, pulse rate detector etc.);
8. assisting in the Caesarian section
9. organization and management of work at the Gynecological Admission Department and in the Gynecological Ward;
10. principles of gynecological examination;
11. criteria used for qualifying patients for operation;
12. management of work in the treatment room, completing and filing records, collecting samples for histopathological and cytological examination;
13. assisting in gynecological surgical procedures;
14. early postoperative monitoring, completing the patients' chart;
15. management of patients admitted for threatened abortion;
16. principles of prevention of neoplasia of the female genital organs and breast;

The training program provided by the Surgical Ward covers the following aspects:

1. organization and management of the ward (admissions to the operating theaters, treatment rooms, admission criteria, completing and filing records, discharging patients from hospital).
2. types of surgical instruments and equipment.
3. improving skills in clinical examination and diagnostic procedures, particularly in emergency cases.
4. learning the rules of wound dressing and suturing techniques, managing fractures and burns.
5. learning the principles and types of local anesthesia.
6. participating in ward rounds and morning briefings done by the doctor in charge.

7. active participation in the functioning of the ward, practicing basic interventions, changing dressings, removing stitches, starting intravenous drips, collecting samples for diagnostic procedures.
8. principles of asepsis and antisepsis, the technique of scrubbing before operation.
9. assisting in surgical procedures in the operating theater.

Throughout the course of training students are expected to make records of their activities and procedures performed. They are also assessed by the instructor in charge and are finally granted their passing mark by the head of the department. Certificates written in English or translated should be submitted to the Dean's Office of the Medical University of Warsaw by October 5 of the subsequent academic year.
